Staff Report

Item # 4D

To: Lemoore City Council
From: David Wlaschin, Public Works Director
Date: October 11, 2010
Subject: Notice of Completion – 16” Water Transmission Line – Halopoff & Sons, Inc.

Background:

Halopoff & Sons, Inc. has completed the installation of a 16” water transmission line. This was part of the Water Arsenic Project awarded in 2009. This phase of the project involved the construction of a transmission line to allow for the movement of water from a storage tank located north of West Hills College to the storage tank at 41 West Cinnamon Drive and the intersection of Lemoore and Glendale Avenues. It also included a line from Well No. 12 located on Cedar Lane at Bevilaqua to the new transmission line at 19 ½ Avenue north of the railroad tracks.

Budget Impact:

Total construction costs are \$2,683,862 and are being paid from Federal American Recovery and Reinvestment Act (ARRA) Funds.

Recommendation:

It is recommended that Council approve the Notice of Completion with Halopoff & Sons, Inc. for the 16” Water Transmission Line and authorize the City Manager to sign.
