

Project: Business Loan Program

Cost: \$750,000

Project Description:

This program is intended to financially assist both small and large businesses whether they are already established in the community or new start-ups. It is recommended that \$750,000 of bond funds be used for a revolving loan program to provide financial assistance to new and existing businesses within the Redevelopment Project Areas. Funds could be used for purposes such as construction, rehabilitation, equipment, furniture, fixtures, purchases, land acquisition, working capital, impact fees, on-site infrastructure, loan guarantee, or other agreed upon uses.

To incentivize business creation and expansion, a loan program could be developed to provide up to \$200,000 for a ten (10) year term. The amount of assistance should be based on the number of new jobs created, the amount of anticipated sales tax revenue generated for the City, or the amount of private capital being invested in the project. Interest rates could vary from as low as 2%, depending on the amount of jobs and/or revenue to the City, and as high as market rate. (Projects involving construction requires the payment of prevailing wage rates if redevelopment funds are utilized at less than market rate.) These, or other terms acceptable to the Board, will be included in a set of guidelines and brought back for further discussion prior to final Board approval.

Additionally, since the Kings County Economic Development Corporation (EDC) is experienced in business lending, staff recommends that this loan program be underwritten and processed through the EDC. Upon consensus of this program, a Memorandum of Understanding (MOU) with the EDC and program guidelines will be developed and brought back for the Board's review and approval.

Need for Project:

- Incentive to attract new businesses to Lemoore
- Expansion assistance for existing businesses
- Support for existing businesses struggling to survive in this downed economy
- Inability of businesses to access conventional bank loans
- Revolving loan funds will be repaid and can continue to support businesses
- Potential job creation
- Potential increased revenue for the City

Drawbacks:

- Only five (5) percent of bond funds can be loaned
- No guarantee that businesses will survive or grow
- Defaulted loans are difficult to recover unless fully secured
- Funds will be tied up for several years before being available to other businesses

Recommendation:

Staff recommends using \$750,000 in bond proceeds for a Business Loan Program.

Project: Railroad Crossings

Cost: \$2,170,000

Project Description:

There is a need for a new railroad crossing at Daphne Lane and improvements to existing railroad crossings at Fox Street, Follett Street, and 19th Avenue. Staff has begun the process with the Public Utilities Commission (PUC) of obtaining permission to construct a new crossing at Daphne Lane, but the San Joaquin Valley Railroad and Union Pacific Railroad are not in favor of approving a new crossing unless an existing crossing is eliminated. Currently, none are proposed for elimination. To make our application more likely to be accepted, staff has proposed making upgrades to one or more of the following existing crossings; Fox Street, Follett Street, and/or 19th Avenue.

Need for Project:

- The crossings at Fox and Follett streets currently do not have crossing arms (gates) and the addition of such would improve the safety at those locations.
- The crossing at 19th has gates; however, upgrades are needed due to the deteriorating condition of the crossing.
- A crossing at Daphne would improve circulation and is necessary for proposed development in that area.

Drawbacks:

- The Daphne Lane Crossing may not be able to be completed in the bond timeframe because of the length of time required to get permission from the railroads and the application and appeal to the PUC.
- For safety purposes, railroads are required by law to sound their whistles at all public grade crossings at least 15 seconds prior to entering a crossing, but not more than 20 seconds. With the addition of a crossing at Daphne, train whistles would be more prevalent in that area.
- Constructing the improvements at Fox Street, Follett Street, and 19th Avenue now will make them ineligible to use for leverage in the Daphne Lane crossing later.
- Impact Fees and RDA tax increment are alternative funding sources for this project.

Recommendation:

Staff does not recommend using bond proceeds for railroad improvements and crossings.

July 12, 2011

David Wlaschin
Public Works Director
711 W. Cinnamon Drive
Lemoore, CA 93245

Dear Mr. Wlaschin:

The SJVR is in receipt of your letter dated May 20, 2011 requesting formal approval for an additional grade crossing in the City of Lemoore at Daphne Lane.

In order to support the addition of an at grade crossing the SJVR will require the closure of at least one existing at grade crossing as an offset. This is consistent with the policies of most Railroads in the US to reduce or at least not increase the number of grade crossings.

The SJVR recommends the closure of Fox Street and/or Follett Street that has access to cross the tracks via Lemoore Avenue to the east and Fox Street to the west. In addition, CPUC Standard No. 9 crossing warning devices should be installed at Fox Street if it is to remain open.

Another alternative that does not involve the risks of a new at grade crossing that should be explored is an additional canal crossing between Hanford Armona Road and D Street. This would facilitate the east-west flow of traffic to the north-south route of 17th Avenue.

Thank you,

A handwritten signature in black ink that reads "Marc Bader".

Project: E Street Public Improvements on Railroad Property Cost: \$500,000

Project Description:

With the recent clearing of blight at 40 E Street, the Board may want to reconsider options for utilizing the site for public purposes. Some potential uses that have been discussed over the years are:

- Community garden
- Parking lot
- BMX track
- Playground
- Basketball/tennis courts
- Park with landscape & a sculpture

In addition to the improvements suggested above, the following have been suggested along the perimeter of Lemoore Avenue & E Street:

- Landscape
- Wrought iron fence

Need for Project:

- Aesthetic improvements along Lemoore Avenue & E Street
- Additional recreational activities for community members

Drawbacks:

- Property owned by railroad
- Lease rate approximately \$1,500 per month, unless negotiated down
- Costly one-time expense to develop
- Ongoing maintenance
- Reduces opportunity for private sector development

Recommendation:

Due to the on-going costs, staff does not recommend using bond proceeds for improvements to the railroad property located at 40 E Street.

Railroad Property – 40 E Street

Project: Indoor Soccer Field at Cinnamon Municipal Complex**Cost: \$138,000****Project Description:**

In order to accommodate adult soccer leagues, the Recreation Department would like to construct an indoor soccer field at the Cinnamon Municipal Complex. The indoor field (rink) is 49' wide and 131' long with Astroturf grass side walls and goals. The revenue that will be generated from league play should offset the increased staffing needed for the facility. This is by far the most requested item staff responds to.

Need for Project:

- The Parks and Recreation commission have been given petitions requesting Lemoore find a home for adults to play soccer.
- Soccer currently being played on basketball and tennis courts, tying up those facilities.
- A recent Kings County study shows the adult soccer leagues as an underserved population.

Drawbacks:

- Parking and supervision for the facility are required
- Janitorial and wear and tear costs are not known
- This could be paid for out of impact fees because it is growth related. The Recreation Facilities impact fee account currently has a balance \$502,000.

Staff Recommendation:

Staff recommends that the RDA Board not move forward with this project using RDA bond proceeds. If the City Council wishes to complete this project, impact fees could be used.

Staff Report

RDA ITEM NO. 14

To: Lemoore Redevelopment Agency Board
From: Judy Holwell, Redevelopment Project Manager
Date: August 11, 2011
Subject: RDA Bond Proceeds – Budget Amendment

Discussion

The following projects reached consensus during the July 19th meeting and later through written consent by Board Member Gordon:

Project Number	Description	Board Members Approving	Cost
2	Wastewater Treatment Plant Upgrade – Engineering and Planning	Gordon Murray Plourde	\$500,000
4	19th Avenue Interchange - Utility Relocation	Murray Plourde Rodarmel	\$3,000,000
5	Police & Fire Dispatch Center - Design and Equipment	Gordon Murray Plourde Rodarmel	\$360,000
9	Storm Drainage Upgrade - Lemoore Industrial Park	Gordon Murray Plourde Rodarmel	\$300,000
12	Underground Docksteader Ditch on Cinnamon Drive and add sidewalk, curb, and gutter	Gordon Murray Plourde Rodarmel Siegel	\$410,000
13	Install Security Cameras at CMC	Gordon Murray Plourde Rodarmel	\$150,000
14	ADA Sidewalks throughout Project Area	Murray Plourde Rodarmel	\$890,695
		Total	\$5,610,695

All of the projects listed above can be started this fiscal year with the exception of the Dockstader Ditch project. In addition, only about \$100,000 of the ADA sidewalks project can be completed this year. Therefore, staff recommends that the Board approve a budget amendment in the amount of \$4,410,000.

Budget Impact

The total amount of bond proceeds available is \$13,295,254. The budget impact for projects identified to begin this fiscal year is \$4,410,000.

Recommendation

That the Agency Board approve a Redevelopment Agency Budget Amendment in the amount of \$4,410,000 for the projects listed above that can begin this fiscal year.

Redevelopment Agency

Staff Report

**RDA SS
 ITEM NO. 3**

To: Lemoore Redevelopment Agency Board
From: Lauren Apone, Administrative Analyst
 Judy Holwell, Redevelopment Project Manager
Date: August 5, 2011
Subject: Discussion on RDA Bond Proceeds Project List

Discussion

On July 19, 2011, the Lemoore Board discussed how to spend the \$13,295,254 in RDA bond proceeds available for capital projects. For that meeting, Staff had provided a detailed analysis of the pros and cons of projects that had received the most interest from both the board and staff, and had made recommendations to the board on which projects should be funded. That staff report and each project memo is attached to this report.

The following projects had reached consensus on July 19th meeting through the approval of the following Council Members

Project Number	Description	Council Members Approving	Cost
2	Wastewater Treatment Plant Upgrade – Engineering and Planning	Gordon Murray Plourde	\$500,000
4	19th Avenue Interchange - Utility Relocation	Murray Plourde Rodarmel	\$3,000,000
5	Police & Fire Dispatch Center - Design and Equipment	Gordon Murray Plourde Rodarmel	\$360,000
9	Storm Drainage Upgrade - Lemoore Industrial Park	Gordon Murray Plourde Rodarmel	\$300,000

12	Underground Docksteader Ditch on Cinnamon Drive and add sidewalk, curb, and gutter	Gordon Murray Plourde Rodarmel Siegel	\$410,000
13	Install Security Cameras at CMC	Gordon Murray Plourde Rodarmel	\$150,000
14	ADA Sidewalks throughout Project Area	Murray Plourde Rodarmel	\$890,695
		Total	\$5,610,695

Councilman Gordon has since submitted a memo with his opinion on the projects presented on July 16th. This memo is attached.

All of the preceding projects except the Docksteader Ditch project can be started this year and are included in a budget amendment that will be before you in regular session. We recently found out that we were awarded the Community Based Transportation Planning Grant for the Docksteader Ditch project that will decrease the RDA cost of that project by approximately \$50,000. This decrease in cost is reflected in the table above. In addition, it is staff's opinion that only about \$100,000 of the ADA sidewalks project can be completed this year. This is reflected in the budget amendment.

Budget Impact

The Redevelopment Agency Board must decide how to spend the remaining \$7,684,559 of the bond proceeds.

Recommendation

That the Agency Board further narrow down the project list for the RDA bond proceeds.

July 25, 2011

TO: Fellow Lemoore City Council Members

FROM: John Gordon

RE: RDA Bond Projects

1. Westside Improvement – I could not support this unless I knew Wal-Mart was coming to Lemoore and that the engineering was done so that we do not cause a traffic problem like 12th Avenue in Hanford.
2. Wastewater Engineering – Yes – As long as it helps the rate payers, the City, and Leprino.
3. Revolving Loan Program – I need to know what businesses we would help that the Economic Development Corporation doesn't already help.
4. 19th Avenue Utility Relocation – Yes – If it moves forward our ability to development our industrial park and increases our tax base.
5. Dispatch Design and Equipment – Yes – Assuming it will reduce the need for impact fees.
6. Video Surveillance – Yes – If it is done only on city property and in no way invades people's privacy.
7. LED Street Lights – Only if I can be shown that it reduces blight and will increase business in our town.
8. Cedar Lane Extension – No – I do not like eminent domain and I believe we need to revisit the closure of Vine Street at Highway 198.
9. Storm Water Drainage in the Industrial Park – Yes – Assuming it helps the development of the park.
10. Road Construction Lot 11 of the Industrial Park – No – We should not be in the Real Estate development business and should leave that to professionals. – More information may sway my opinion.
11. Venture Place Road Construction Lot 14 – No – For the reasons stated in #10.
12. Underground Dockstader Ditch – Yes – It is a safety concern and we need to make Cinnamon Municipal Complex user friendly to potential businesses and to Lemoore's youth so that they have a positive relationship with the City.
13. Security Cameras at CMC – Yes – They will pay for themselves by reducing the amount of shrinkage the City feels due to property loss.
14. ADA Sidewalks – I believe our first priority should be to create a safe railroad crossing at Fox St.
15. Entrance Signage – No – It might be pretty, but it does not bring more business to our town.

16. Brick Stamping – No – For the reasons stated in #15.
17. Railroad Upgrade at Fox St. – Yes – We need a feasible crossing into downtown for the Senior Citizens that will be living at new Senior Housing on the corner of Fox St. and Cinnamon St. None of our railroad crossings are user friendly to wheelchairs or scooters and create a barrier in the middle of our City.
19. Cooling Center at the Senior Citizen Center – Yes – The RDA is meant to also help low to moderate income housing and this helps people maintain a livable residence. Some people cannot afford air conditioning and need a place of refuge. Additionally, electricity is the Senior Citizens Center greatest expense and this plan could keep them solvent for many more years. We could also require that the Center maintain a better budgeting system as part of the City's investment in them. The bottom line is we do not want the Center to go belly up and become the City's responsibility.
20. Expand CMC Parking – Yes – Use RDA funds instead impact fees so that we can lower impact fees and we need the larger parking lot to fully utilize the Complex.
21. Move Planning and Recreation to CMC – Yes – We need to centralize staff as much as possible so that they can operate more efficiently and provide a better service to our community. Plus, the reasons stated in #20.
22. Softball Field and Swimming Pool Partnership with West Hills – There is a great demand for these recreation activities in our town and it makes sense to partner up because we both have Bond Funds available to create a mutually beneficial project.

Note: Feel free to publish this memo.

Staff Report

SS ITEM NO. 4

To: Lemoore Redevelopment Agency Board
From: Lauren Apone, Administrative Analyst
Judy Holwell, Redevelopment Project Manager
Date: July 14, 2011
Subject: Discussion on RDA Bond Proceeds Project List

Discussion

On March 4, 2011, the Lemoore Redevelopment Agency issued bonds in the amount of \$13,295,254 for capital projects. At that time, 43 projects totaling \$88 million were identified as potential projects to undertake with this bond proceeds money. It is now time to narrow down this project list to encompass projects whose costs will not exceed the \$13,295,254 limit.

Attached is a spreadsheet giving staff recommendations for which projects should be funded. The projects are broken down into two groups: recommended to be funded and not recommended to be funded. Each project is also labeled with a number. This number is NOT a priority number, but instead a number that references a write-up that provides a more detailed analysis of some of the projects. Staff identified projects that received the most interest from Board Members and Staff to perform a detailed write-up including project description, need for project, drawbacks, staff recommendation, and maps or other explanatory information so that the Board could make a more informed decision on which projects to choose. The projects that were not chosen for a write-up either did not have much interest from Board Members or could not feasibly be completed within the 3-5 year time period required by the bonds.

On Tuesday afternoon, the Board will need to answer the following questions:

- Which projects should the RDA proceed with?
- Which projects should the RDA begin this fiscal year, once the RDA can get back into business?

Budget Impact

The Redevelopment Agency Board must decide how to spend the bond proceeds amount of \$13,295,254 for capital projects.

Recommendation

That the Agency Board direct staff to proceed with preparing a budget for specific projects. A budget amendment will then be prepared for final consideration by the Board.

RDA Tax Increment Bond Issue - 2011

Project: Street Improvements Near Bush/Highway 41

Cost: \$2,754,559

Project Description:

On September 21, 2010, the RDA Board approved resolution 2010-02 (attached), which committed approximately \$3,200,000 in RDA funding to make the following improvements on the West Side.

<u>Project</u>	<u>Location</u>	<u>Improvement</u>	<u>Est. Cost</u>
Bush Street	Semas to Belle Haven	Widen to 8 Lanes w/Median	\$690,266
Belle Haven Dr.	Bush to RR Tracks	Realign/Construct 4 Lanes	\$759,293
RR Crossing	College/RR Tracks	Construct RR Crossing	\$517,500
Traffic Signal	Bush/Semas	Construct New Signal	\$345,000
Traffic Signal	SR41/Bush SB Ramp Terminus	Construct New Signal	\$460,000
Traffic Signal	SR41/Bush NB Ramp Terminus	Construct New Signal	\$460,000
			<u>\$3,232,059</u>

Need for Project:

- RDA Board already committed RDA increment towards these projects in order to promote business development on the West Side and keep West Side impact fees lower.
- Using RDA bond proceeds to pay for this improvement will free up future increment that is able to be spent more freely.

Drawbacks:

- Some of these improvements may not be needed in the near future if Walmart does not develop (widening of Bush Street, realignment of Belle Haven Drive, Bush and Semas traffic signal).
- Some of these improvements are not feasible to construct under the 3-5 year window (Railroad crossing)
- Traffic Signals at the off ramps of Highway 41 will require Caltrans approval and meet warrants.

Staff Recommendation:

Proceed with the following projects that can be completed within the timeframe needed:

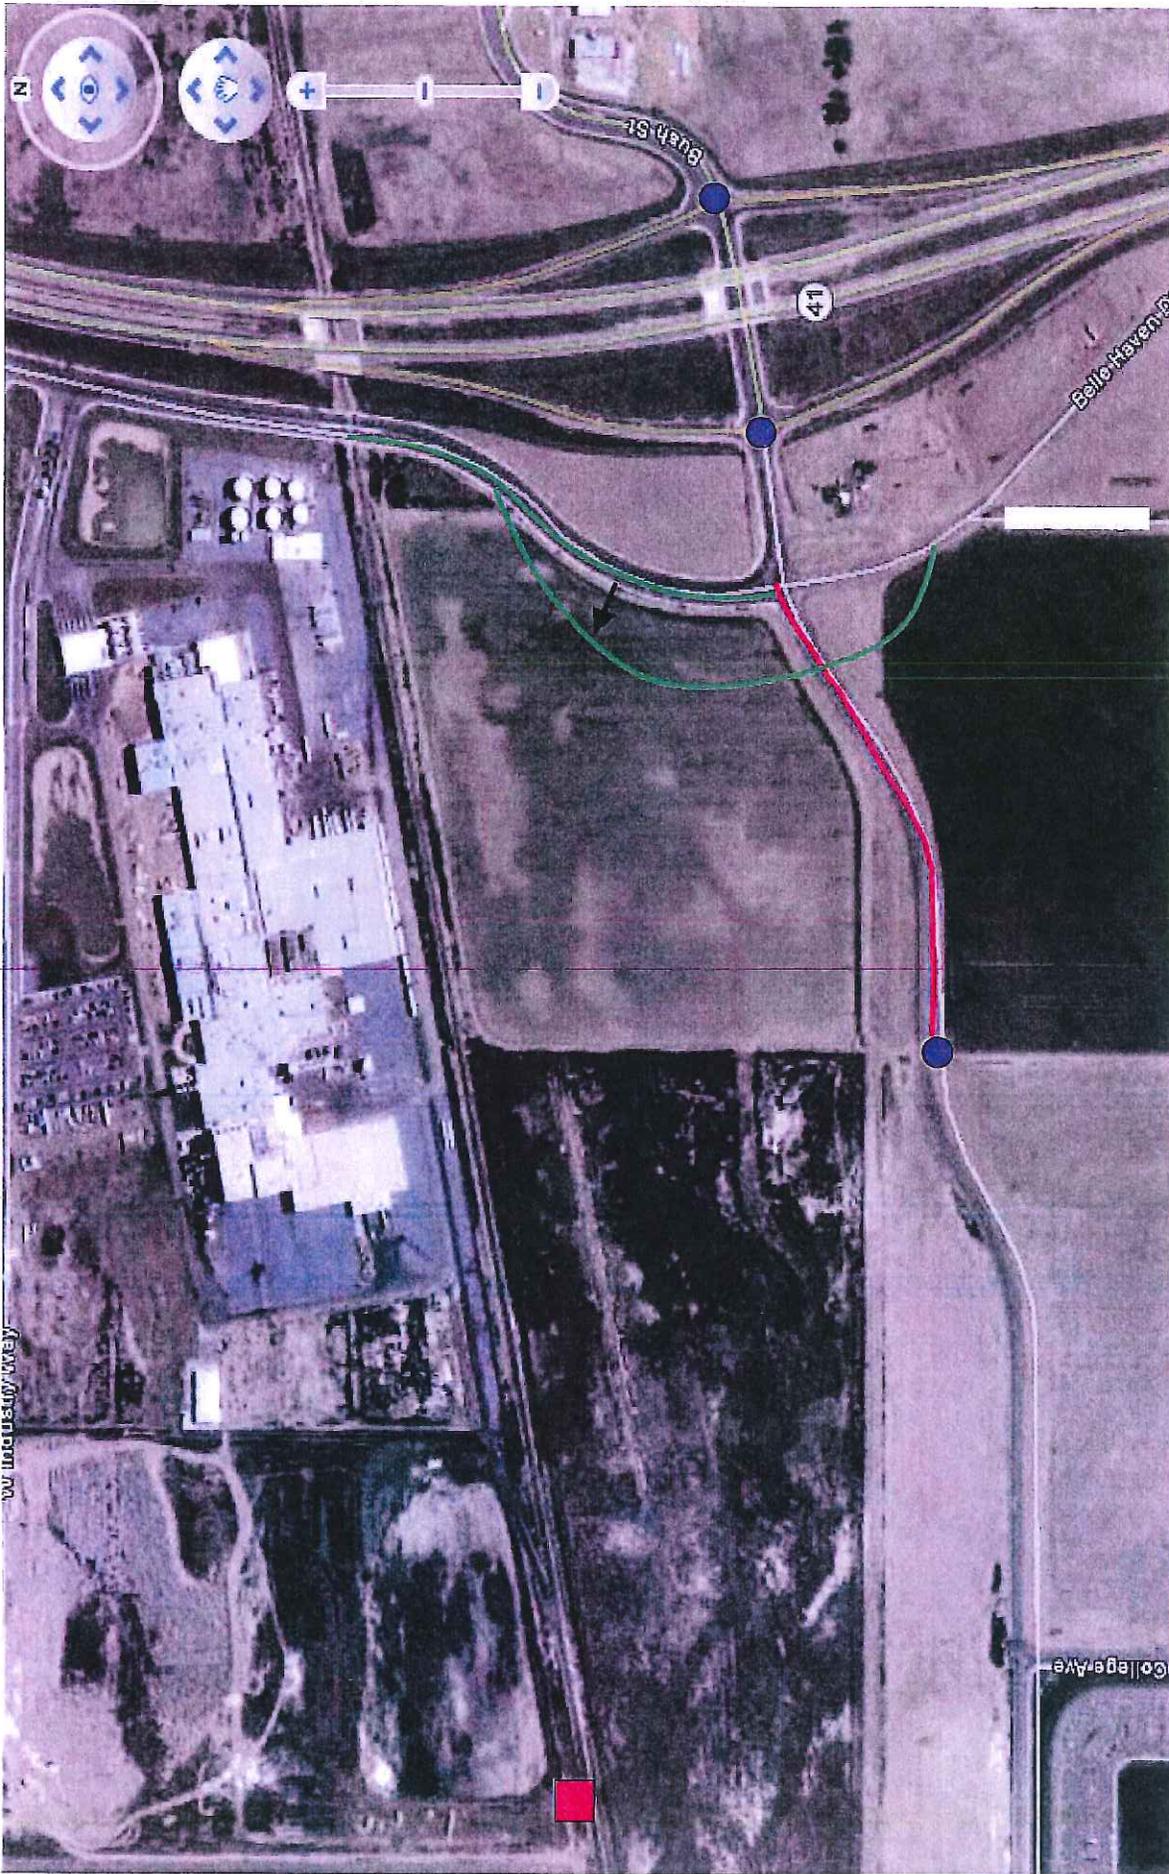

Phase I: Commence warrant study for traffic signals at Highway 41 off ramps \$20,000

Phase II: Proceed with the following projects if given Caltrans approval

Traffic Signal	SR41/Bush SB Ramp Terminus	Construct New Signal	\$460,000
Traffic Signal	SR41/Bush NB Ramp Terminus	Construct New Signal	\$460,000
Total Phase I and II			\$940,000

Phase III: If Walmart develops within the 3-5 year time window, complete the following projects:

Bush Street	Semas to Belle Haven	Widen to 8 Lanes w/Median	\$690,266
Belle Haven Dr.	Bush to RR Tracks	Realign/Construct 4 Lanes	\$759,293
Traffic Signal	Bush/Semas	Construct New Signal	\$345,000
Total Phase III			\$1,794,559

- Construct Railroad Crossing
- Construct Traffic Signal
- Widen to 8 Lanes With Median
- Realign/Construct 4 Lanes

RESOLUTION NO. 2010-02

**A RESOLUTION OF THE LEMOORE REDEVELOPMENT AGENCY
DEDICATING FUNDING TO CERTAIN TRAFFIC IMPROVEMENTS
WITHIN AMENDMENT 2 REDEVELOPMENT AREA**

At a Regular Meeting of the Board of Directors of the Lemoore Redevelopment Agency duly called and held on September 21, 2010 at 7:30 p.m. on said day, it was moved by Board Member Rodarmel and seconded by Board Member Siegel and carried that the following Resolution be adopted:

WHEREAS the adopted goals of the Lemoore Redevelopment Agency include "encourag[ing] employment opportunities through environmental and economic improvements resulting from ... redevelopment activities" and "provid[ing] public infrastructure improvements and community facilities, such as the installation, construction, and/or reconstruction of streets, utilities, public buildings, facilities, structures, street lighting, landscaping and other improvements which are necessary for the effective redevelopment of the Project Area"; and

WHEREAS the City of Lemoore has identified long-term improvements within the territory added to the Redevelopment Project Area by Amendment #2 that would greatly benefit future commercial and industrial businesses that may locate within that area; and

WHEREAS funding the construction of said traffic improvements identified by the City, as listed below, would be in keeping with the goals of the Redevelopment Agency; and

Project	Location	Improvement	Current Est. Project Cost
Bush St	Semas to Belle Haven	Widen to 8 Lanes w/Median	\$ 690,266
Belle Haven Dr	Bush to RR Tracks	Realign/Construct 4 Lanes	\$ 759,293
RR Crossing	College/RR Tracks	Construct RR Crossing	\$ 517,500
Traffic Signal	Bush/Semas	Construct New Signal	\$ 345,000
Traffic Signal	SR41/Bush SB Ramp Terminus	Construct New Signal	\$ 460,000
Traffic Signal	SR41/Bush NB Ramp Terminus	Construct New Signal	\$ 460,000
			<u>\$ 3,232,059</u>

WHEREAS the timing of the construction of said project may require funding in amounts beyond the current estimated total cost of \$3,232,059 due to the inflationary nature of construction costs.

NOW, THEREFORE, BE IT RESOLVED that the Board of Directors of the Lemoore Redevelopment Agency commits to fund each of the above traffic improvements in their entirety at such time as the improvements are needed to support the development of the territory added to the Redevelopment Project Area by Amendment #2.

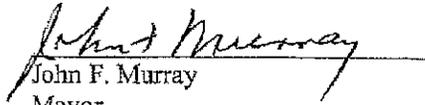

BE IT FURTHER RESOLVED that we hereby direct staff to take all steps necessary to

establish an agreement between the Lemoore Redevelopment Agency and the City of Lemoore necessary to implement the commitment of funds.

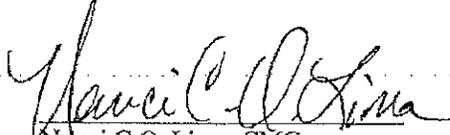

Passed and adopted at a Regular Meeting of the Board of Directors of the Lemoore Redevelopment Agency held on the 21st day of September, 2010 by the following vote:

Ayes: Rodarmel, Siegel, Hornsby, Murray
Noes: Flourde
Absent: None
Abstaining: None

Approved:

John F. Murray
Mayor

Attest:

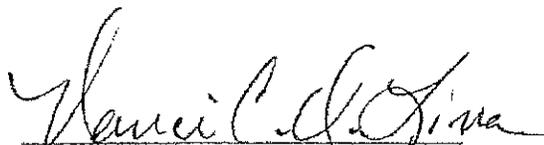

Nancy C.O. Lima, CMC
City Clerk

I, Nanci C.O. LIMA, City Clerk of the City of Lemoore do hereby certify the foregoing Resolution of the City Council of the City of Lemoore was duly passed and adopted at a Regular Meeting of the City Council held on the 21st day of September, 2010.

Dated: September 22, 2010

Nanci C.O. Lima, CMC
City Clerk

Project: Wastewater Treatment Plant Upgrade (Engineering/Planning) Cost: \$500,000

Project Description:

The City of Lemoore will need to replace our wastewater treatment plant in the next 5 to 10 years because the system of ponds will no longer be in compliance with California Regional Water Quality Control Board requirements. In anticipation of this new requirement, the City of Lemoore increased Sewer rates to its customers in December of 2007. The entire project is anticipated to cost \$40 million, and the engineering and planning cost is anticipated to be around \$2 million.

Need for Project:

- Using RDA bond proceeds to pay this engineering and planning has the potential to alleviate some of the burden from the sewer rate payers.

Drawbacks:

- The entire \$2 million in engineering and planning costs cannot be feasibly be spent within the 3-5 year window

Staff Recommendation:

Begin the portions of the engineering and planning for the wastewater treatment plant that can feasibly be completed during the bond timeframe at an anticipated cost of \$500,000.

Project: 19th Avenue Interchange – Utility Relocation**Cost: \$3,000,000****Project Description:**

Prior to construction of the 19th Avenue Interchange over State Route 198, all utilities will need to be relocated so that they do not interfere with the project.

Project	Location	Improvement	Est. Cost
Utility Relocation	SR 198/19 th Avenue	Sewer/Water/Storm/Irrigation	<u>\$3,000,000</u>

Need for Project:

- On February 7, 1984, the City entered into an agreement with the State of California, for the future construction of an interchange at State Route 198/19th Avenue.
- This project is identified in the General Plan.
- The City Council and RDA Board have committed funding to this project in the form of granting rights-of-way to Caltrans.
 - The City is dedicating the park/ponding basin property at Vieira Field
 - The RDA is dedicating property adjacent to SR 198 and 19th Avenue
 - The RDA is dedicating properties on Carmel Drive and Stinson Drive that were purchased specifically for this project. The sites currently have housing units on them, which will need to be demolished or relocated.
- This project is necessary for its short and long-term economic benefits.
 - Short-term construction jobs
 - Long-term economic development in the Lemoore Industrial Park
- This project will eliminate one of the barriers to industrial development on the south side, which is easy access on and off the highway system.

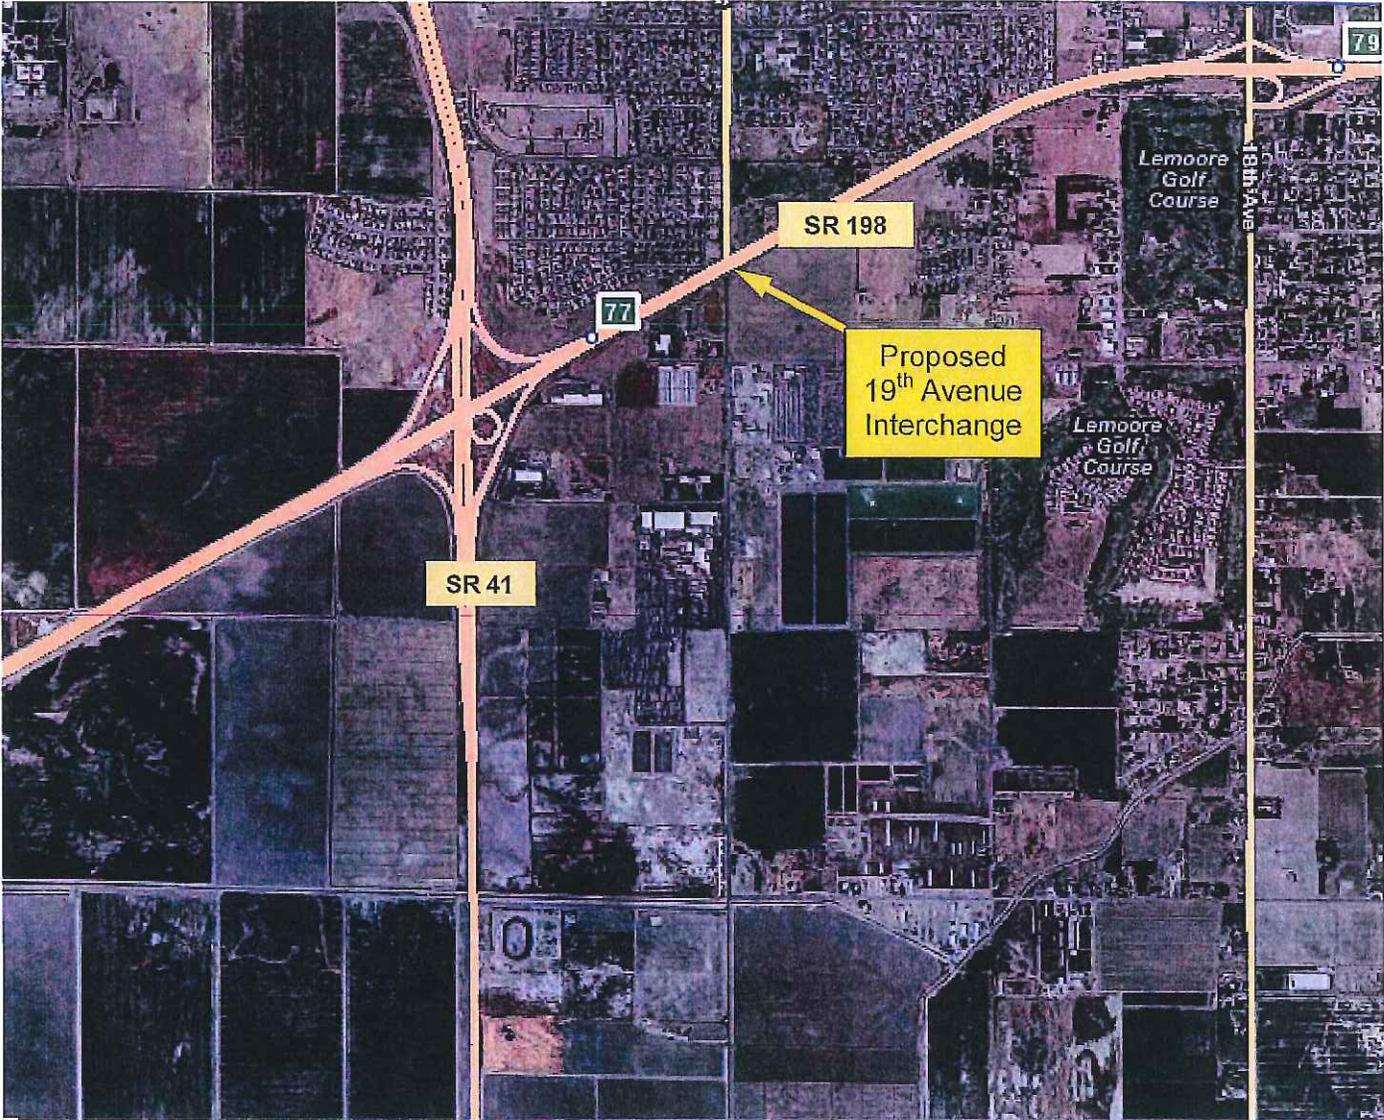

Drawbacks:

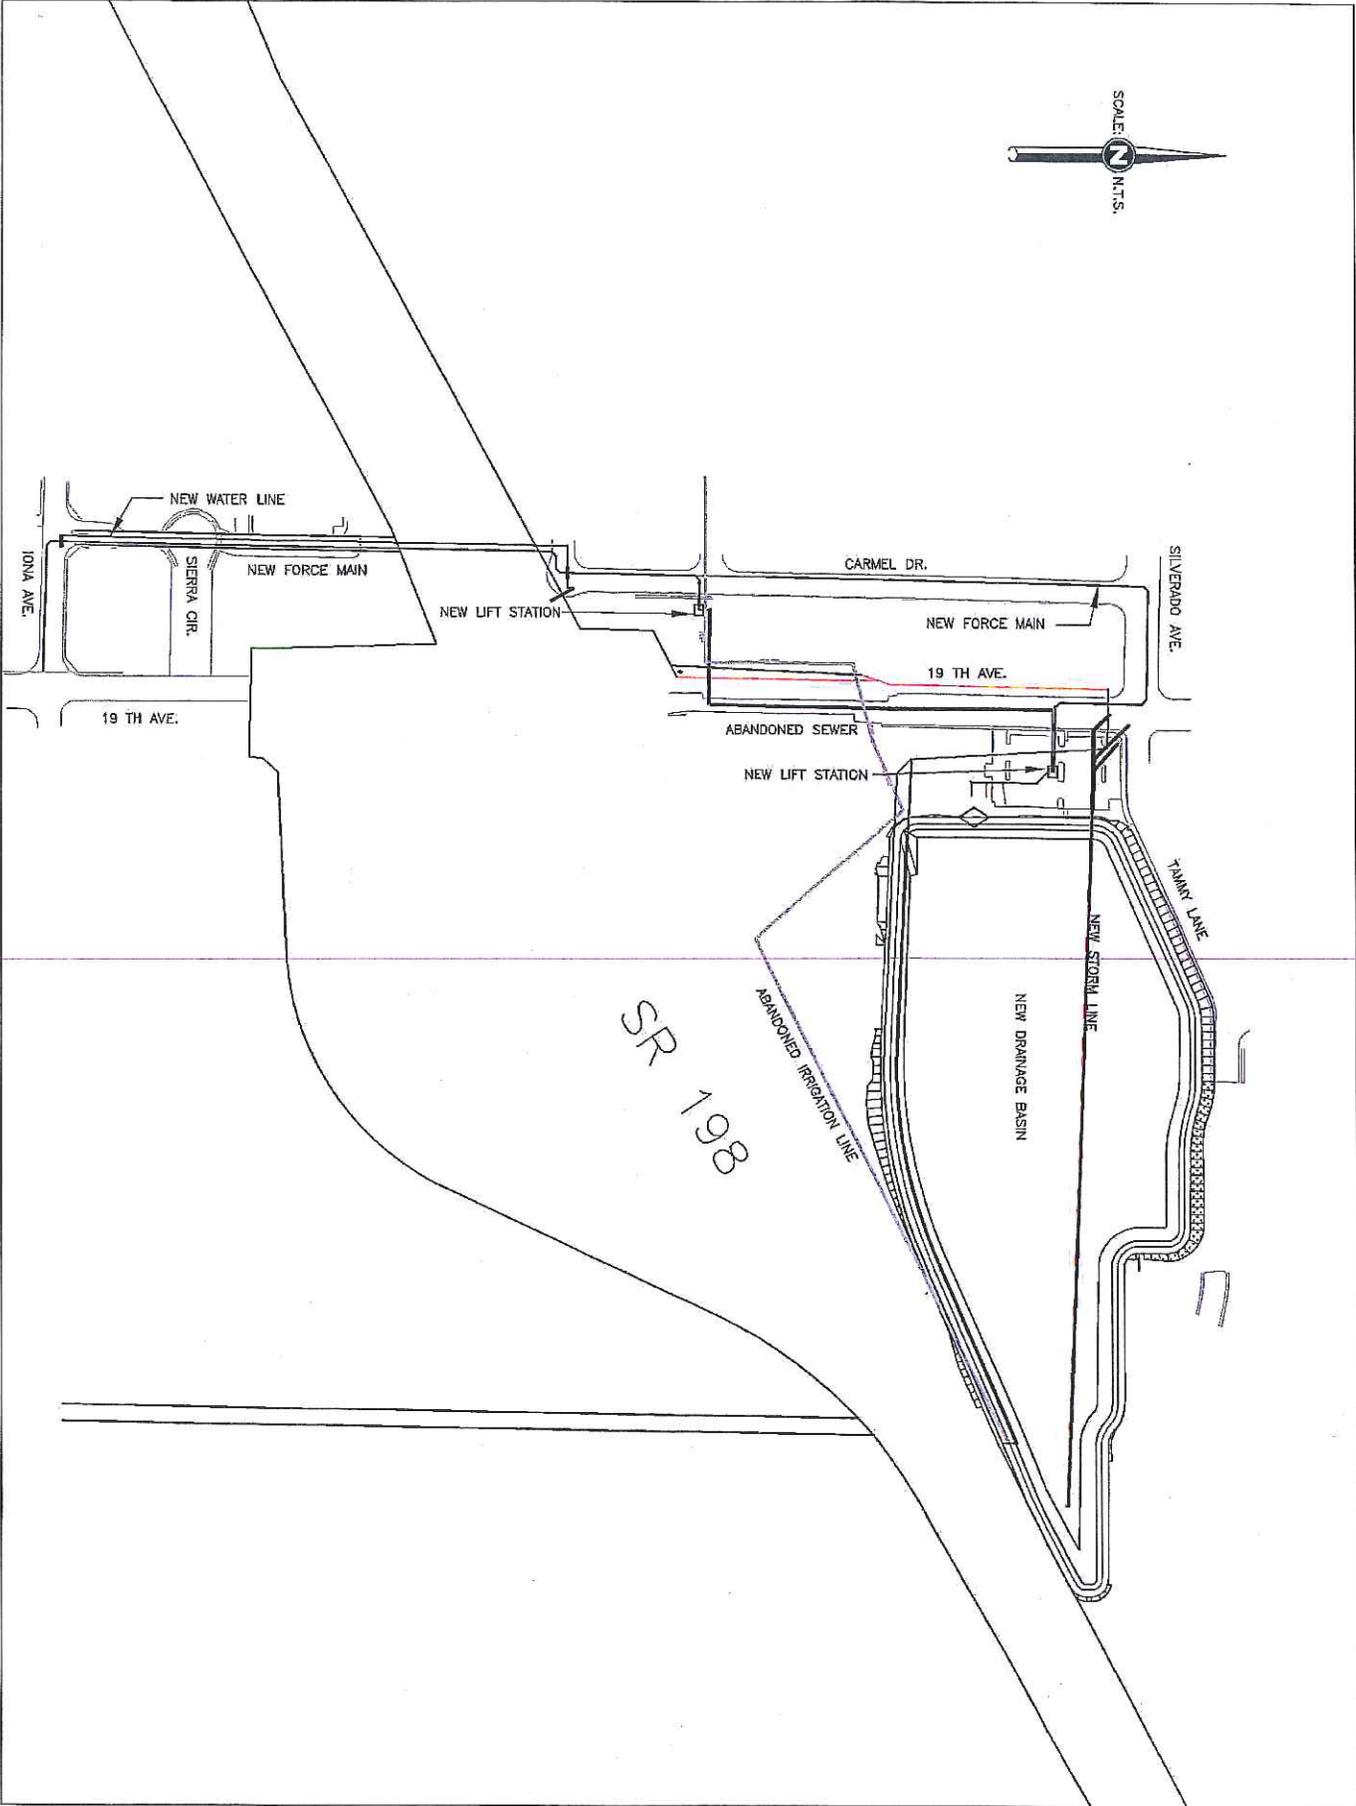

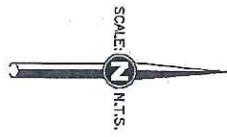

- Potentially, there may be other grant funding available through entities such as the Economic Development Administration (EDA), Corridor Mobility Improvement Account (CMIA), or the Community Development Block Grant (CDBG) – Enterprise Fund.
- Utility relocation could be premature, since there is no guarantee that the interchange will be built soon or whether it will be built at all.

Recommendation:

This is a high priority. The Board should program \$3,000,000 for this project. However, prior to expending any bond proceeds on this project, staff should continue to pursue grant opportunities that may be available.

Project: Police & Fire Dispatch Center – Design and Equipment

Cost: \$360,000

Project Description:

In January of 2010, Council approved a concept for construction of a locally controlled dispatch center at the Lemoore Police Department. Council decided on a design option that included relocating the main entrance of the Police Department to the west end of the building and converting the covered carport to the dispatch center. Once this project is complete, the City will be able to perform its own dispatch service, instead of contracting with the City of Hanford. This proposed project includes \$360,000 for the design and equipment costs for this new facility so as not to trigger prevailing wage, while the construction will be funded through Law Enforcement impact fees and COPS funding. To date, the balance in the Law Enforcement Impact Fee Account is \$321,000 and the dedicated COPS Funding is \$304,000, with an additional \$100,000 expected to be received and dedicated to this project in FY 11/12. The total cost for construction is anticipated to be 810,000.

Need for Project:

- This project will allow the City of Lemoore to have control over its own dispatch service and be more able to control the quality and the costs.

Drawbacks:

- The construction of the dispatch center is not completely funded using impact fees and COPS funding. There is a funding gap of \$85,000 that needs to be addressed before we can complete this project.

Staff Recommendation:

Staff recommends that the RDA Board use bond proceeds to pay for this project.

Project: Video Camera Surveillance System

Cost: \$300,000

Project Description:

Chief Laws has previously recommended that the City install video surveillance cameras in public areas throughout the City. For the proposed \$300,000 project, 25 cameras would be installed throughout the City at the skate park, other parks, train depot, and other high volume public areas. These cameras would record 24 hours per day and the data stored on a server until the footage is needed. With the construction of the dispatch center, dispatchers would monitor the camera live feed. Chief Laws supports this project because similar systems have helped tremendously in helping the Police Department solve crimes in the City of Lemoore. Cameras are already installed at various schools where the footage has led to arrests. In the City of Fresno, police used surveillance footage to find a kidnapped child.

Need for Project:

- This project will help police solve crimes more efficiently and has the potential to reduce crime in the City of Lemoore.
- Rick Rayburn, Superintendent of Lemoore Union Elementary School District, has previously supported camera surveillance at the skate park, citing that a large number of the incidents at Liberty Middle School start or end at the skate park.
- This project is not eligible for impact fee use, and thus the only other potential funding source is the General Fund.

Drawbacks:

- If the cameras are damaged, there would be repair and replacement costs.

Staff Recommendation:

Staff recommends that the RDA Board use bond proceeds to pay for this project.

Project: LED Street Light Replacements

Cost: \$425,000

Project Description:

In December 2010, the City of Lemoore used Energy Efficiency and Conservation Block Grant (EECBG) funding from the American recovery and Reinvestment Act (ARRA) to replace 283 High Pressure Sodium Vapor (HPSV) street lights with LEDs. The areas that were completed were the street lights that the City owns east of Lemoore Avenue and portions of Cinnamon Drive.

LED streetlights use approximately one-third of the energy of HPSV lamps and their increased longevity promises reduced maintenance over the life of the fixture. Staff has identified approximately 900 additional street lights that are in the RDA project area, are not in a Public Facilities Maintenance District (PFMD), and are owned by the City, that are proposed to be replaced with this project

Need for Project:

- Chief Laws is in support of this project because the LED lights provide for better lit areas of the project area.
- The estimated annual General Fund cost savings from energy costs alone is \$34,764. This constitutes a 12 year pay pack period.
- In addition, lower maintenance expenses have the potential to save an additional \$6,300 annually.
- The only other source of funding for this project is the General Fund.

Drawbacks:

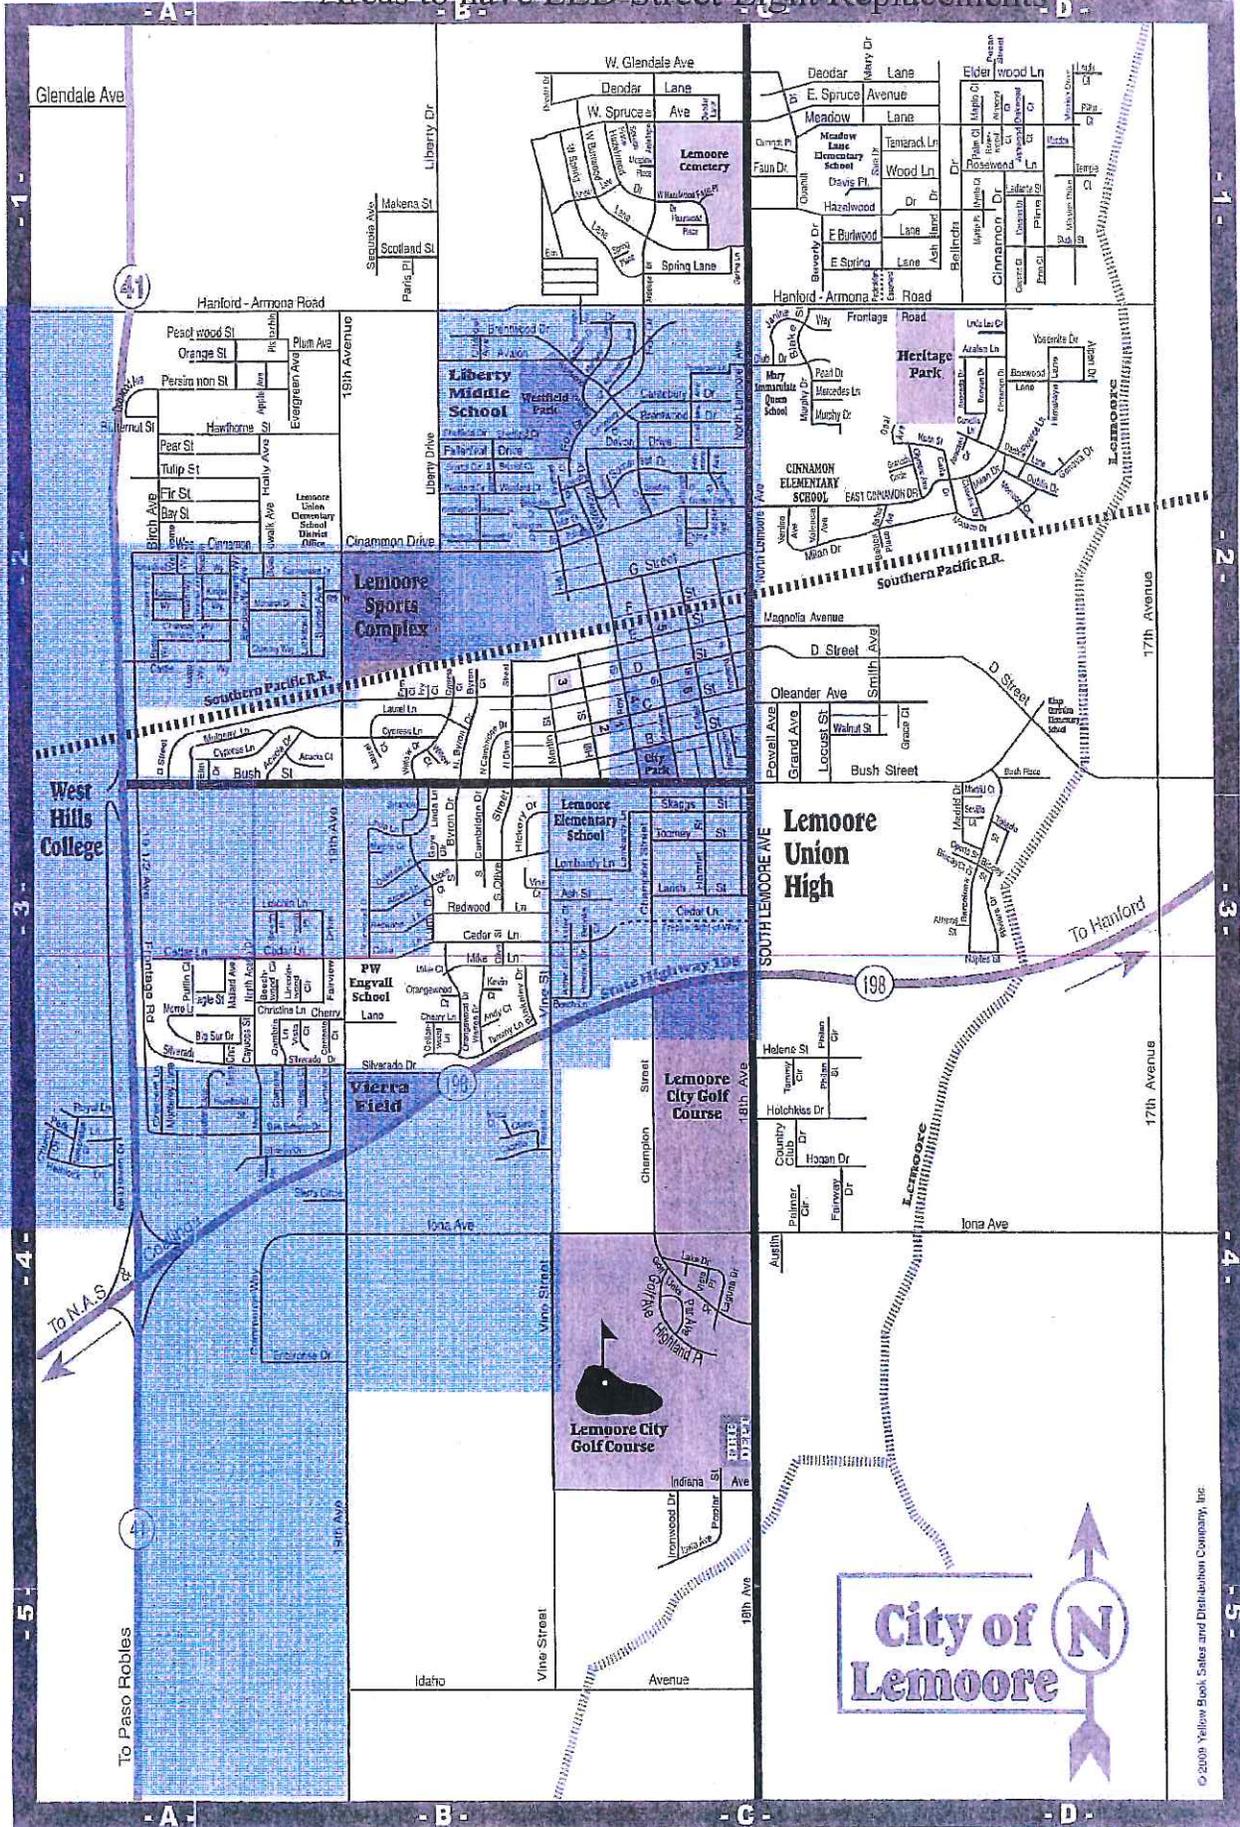

- These lights have a higher replacement costs than conventional HPSV fixtures.

Staff Recommendation:

Staff recommends that the RDA Board use bond proceeds to pay for this project.

Areas to have LED Street Light Replacements

Street lights on the West Side will also be replaced

Project: Cedar Lane Extension Design and Right of Way

Cost: \$560,000

Project Description:

With the construction of the 19th Avenue interchange, the entrance to SR 198 at Vine Street will be closed. This leaves an area of the City that now has to travel north to Bush Street and then south on Lemoore Avenue in order to get access to SR 198. To help alleviate the traffic on Bush Street, our engineers have proposed extending Cedar Lane east to Lemoore Avenue. In order to do so, we will need to acquire right of way. This project is only for the design and right of way acquisition costs, so as not to trigger prevailing wage for construction.

Need for Project:

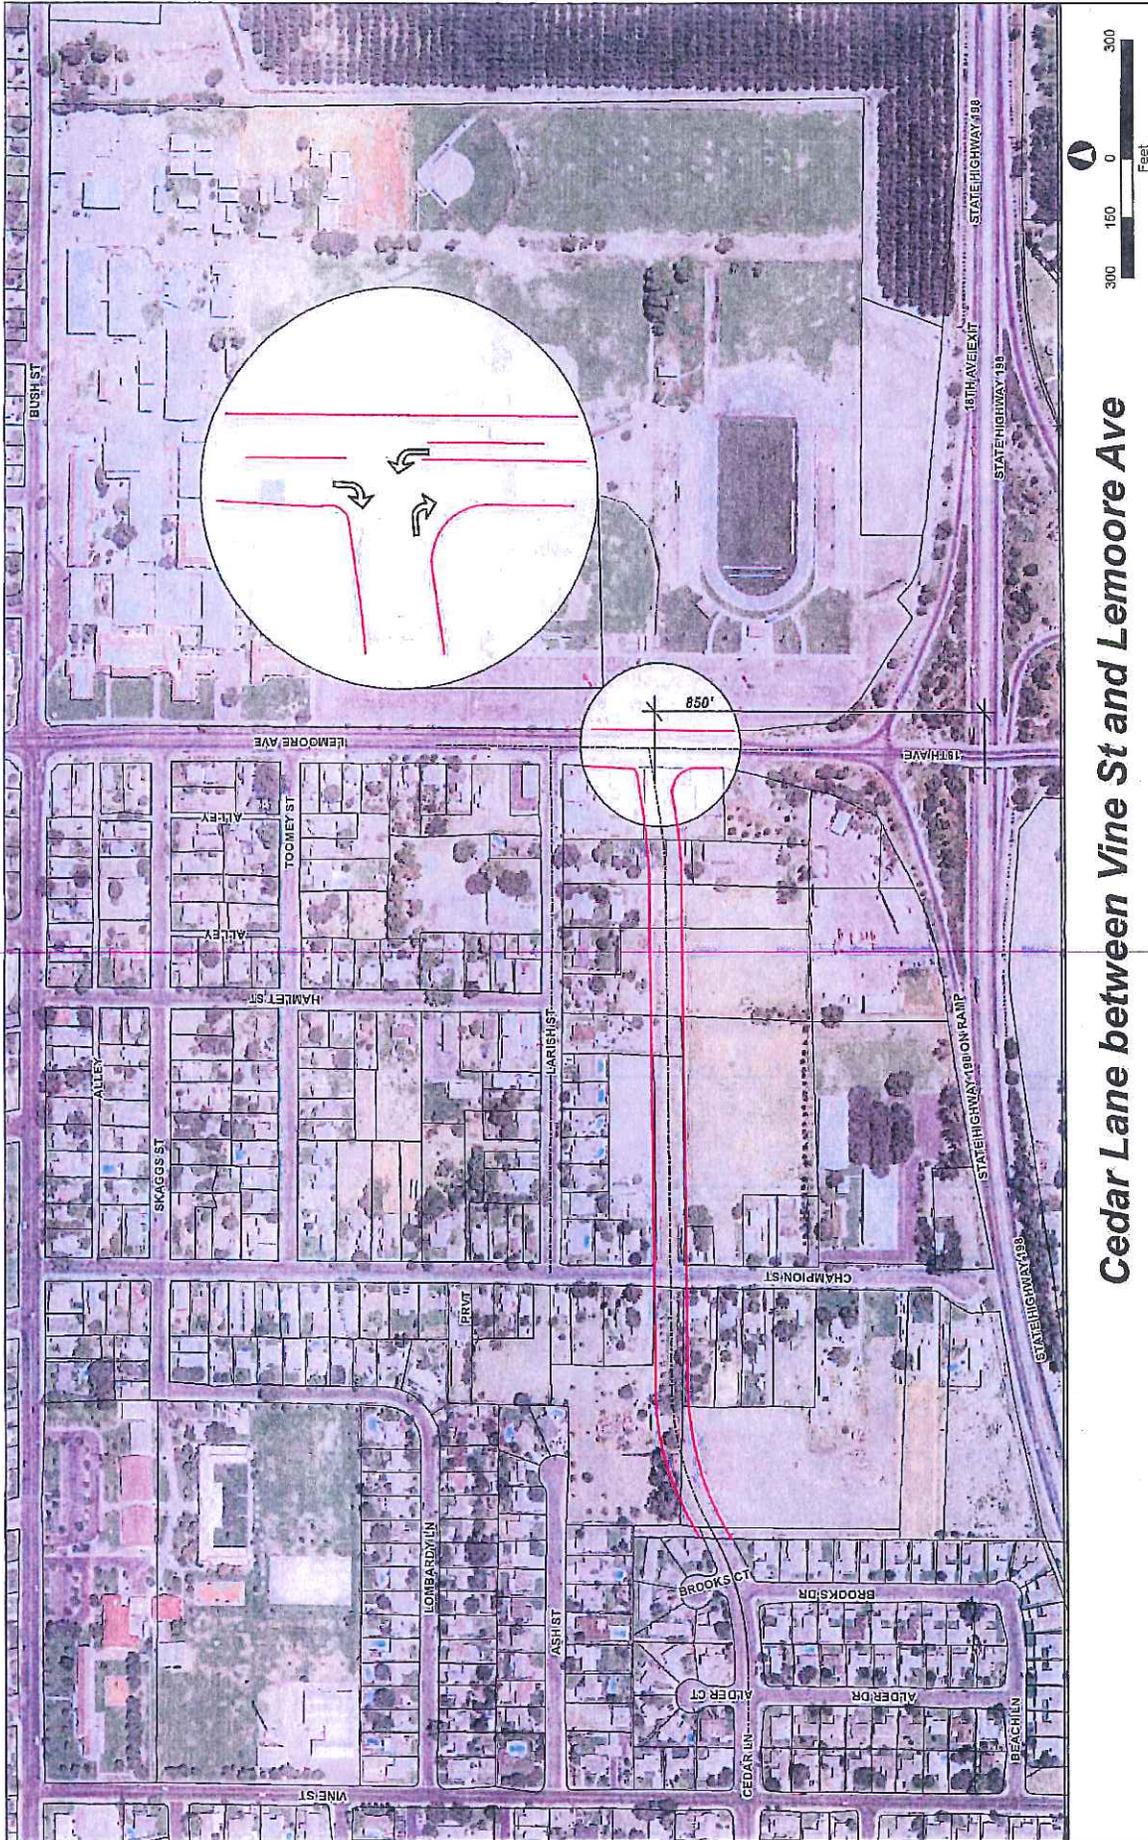

- This project will alleviate traffic congestion on Bush Street once the Vine Street entrance to SR 198 is closed.
- This project will require demolition of two residential units and restriction to a commercial business on Lemoore Avenue

Drawbacks:

- These improvements are not needed immediately and it is not known when the Vine Street entrance will close.

Staff Recommendation:

Staff recommends that the RDA Board use bond proceeds to pay for this project.

Cedar Lane between Vine St and Lemoore Ave

Project: Storm Drainage Improvements – Industrial Park

Cost: \$300,000

Project Description:

This project proposes alleviate flooding in the Lemoore Industrial Park. This project would include construction of a pump station on the 84-acre property owned by the RDA north of Idaho and West of 19th Avenue. This pump station would pump water into the canal and a drainage basin that would also be constructed as part of that project.

Need for Project:

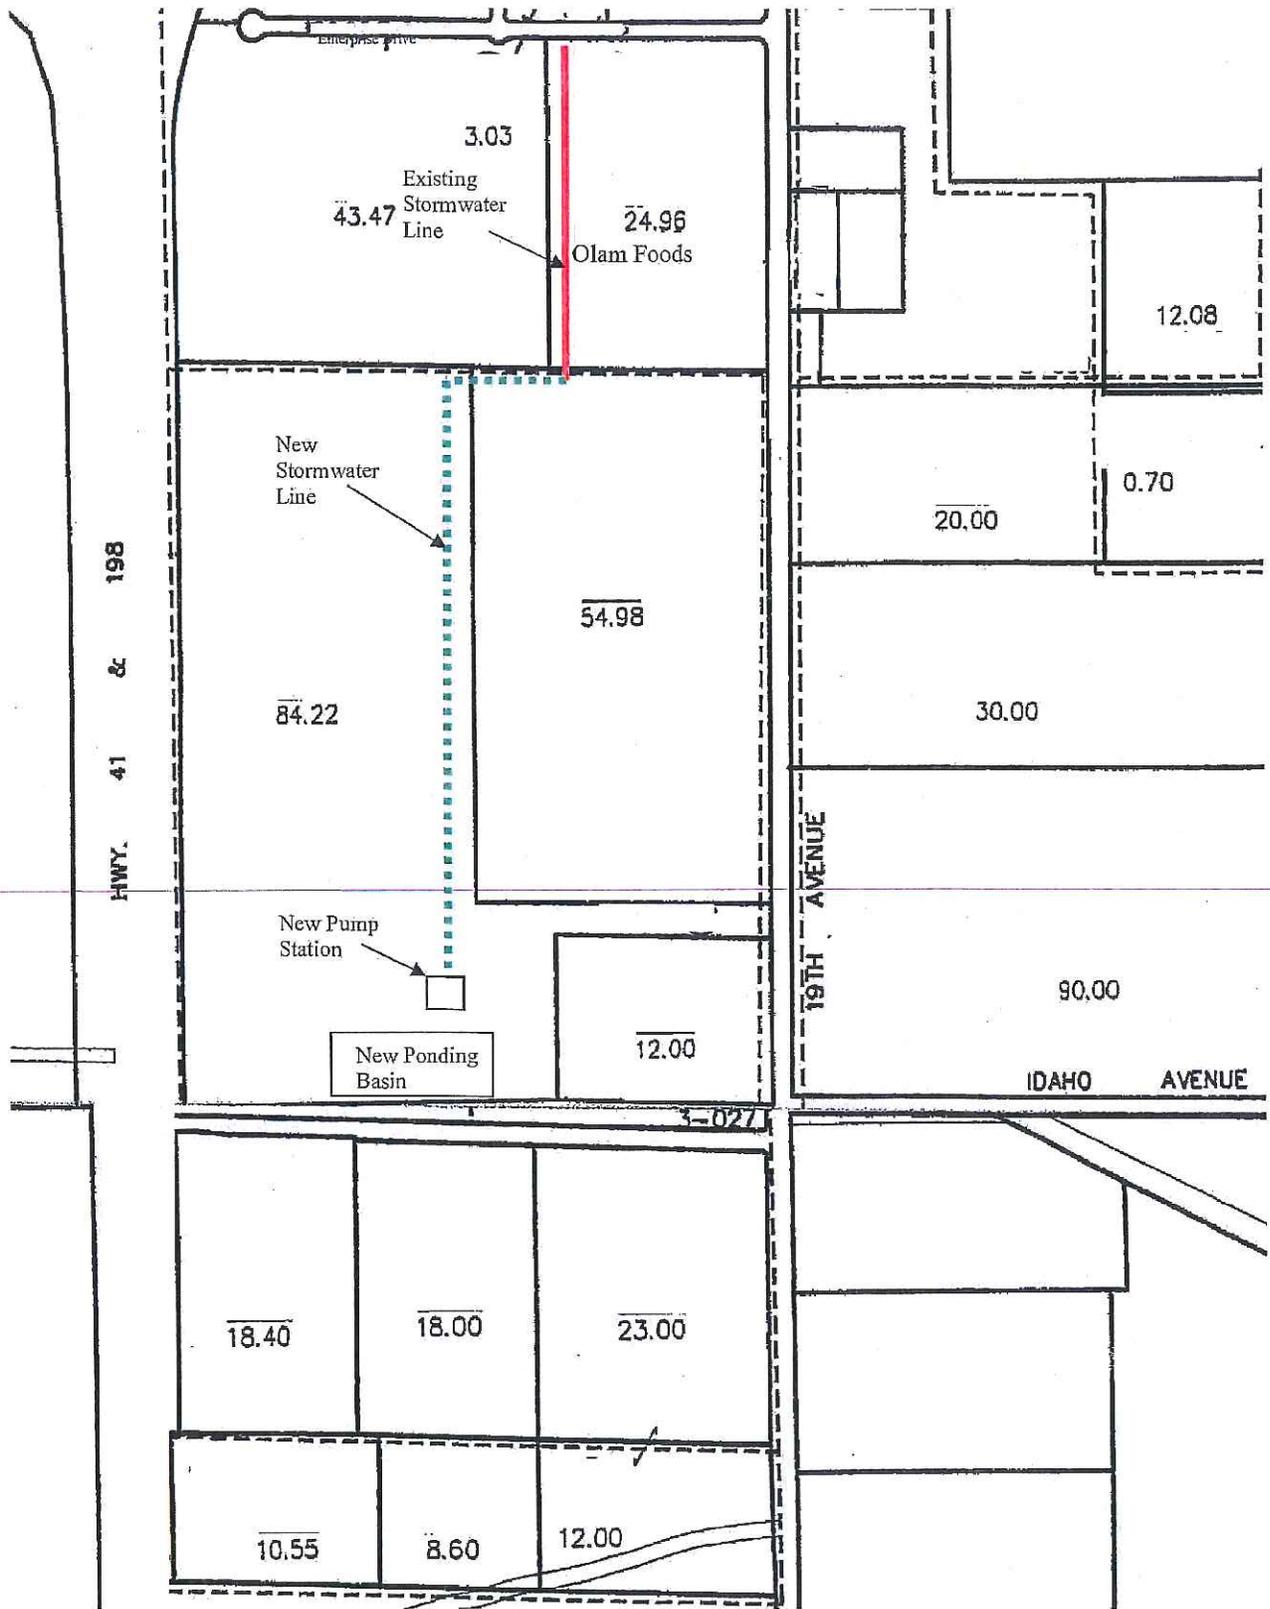

- This portion of the Lemoore Industrial park frequently floods in the winter. Alleviating this flooding may help attract businesses to the Lemoore Industrial Park.

Drawbacks:

- These improvements are not needed now because there is no development in this area.

Staff Recommendation:

Staff recommends that the RDA Board use bond proceeds to pay for this project.

Project: Road Construction – Lot 11 – Lemoore Industrial Park Cost: \$1,400,000

Project Description:

This project will provide street access to approximately 85 acres of vacant RDA land in the Lemoore Industrial Park, which will be used for future development. The project consists of a road off Enterprise Drive heading south to Idaho Avenue and a road off 19th Avenue south of Olam Tomato Processors heading west to the site. The project also includes undergrounding the D1 Ditch, installation of water, sewer and storm drain lines, and a sewer lift station. This is part of a comprehensive project that the Kings County Economic Development Corporation (KEDC) has submitted to the federal Economic Development Administration (EDA) called the Kings County Comprehensive Economic Development Strategy (CEDS). The total project cost of this project is estimated at \$3,500,000 of which, \$1,400,000 is the local match. This project will also benefit the City/RDA vacant property south of Idaho Avenue by bringing City utilities to just north of the properties located there.

<u>Project</u>	<u>Location</u>	<u>Improvement</u>	<u>Est. Cost</u>
Lot 11	Lemoore Industrial Park	Install Infrastructure	<u>\$3,500,000</u>

Need for Project:

- This project will open up 85 acres of unimproved City owned property in the Lemoore Industrial Park for future business development and job creation.
- This project will bring City utilities to the north side of Idaho Avenue, which will be in close proximity for additional development to occur south of Idaho Avenue on the vacant 72 acres owned by the City/RDA and will benefit the Lemoore Racing Enterprises site, as well.
- This project is identified in the Kings County CEDS Report (attached).
- This project is necessary for its short and long-term economic benefits.
 - Short-term construction jobs
 - Long-term economic development in the Lemoore Industrial Park

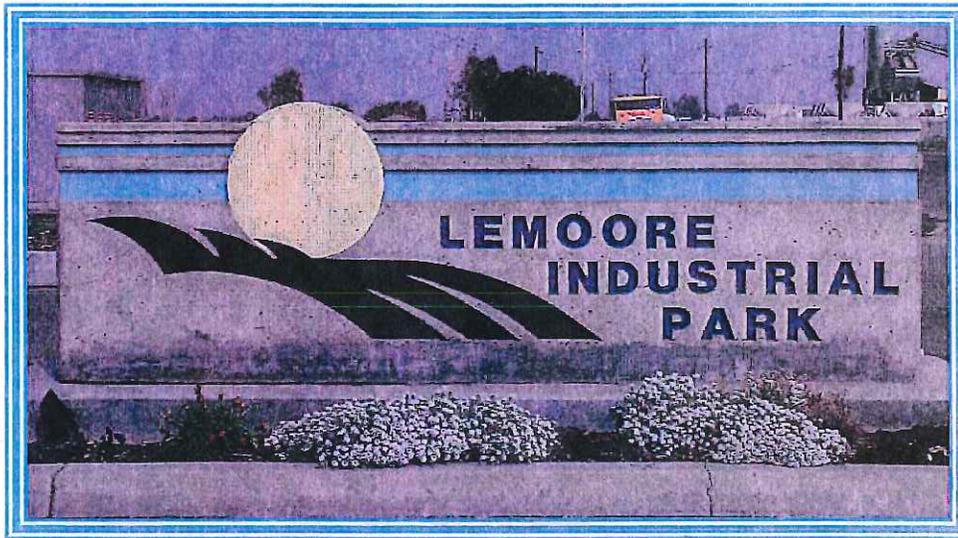

Drawbacks:

- EDA funding to complete the comprehensive project may take several years to obtain.
- No ROW off Enterprise Drive through lot labeled SSC Farming LLC.
- No guarantee on the number of jobs that will be created.

Recommendation:

Staff recommends that the RDA Board use \$1,400,000 in bond proceeds for the grant match and apply for EDA grant funds in order to complete the comprehensive project as outlined in the CEDS Report.

STRATEGY COMMITTEE

JUNE 30, 2011

CITY OF LEMOORE

PROJECT 1

1. ***Title or Name of Project Application:*** Lemoore Industrial Park Infrastructure
2. ***Purpose:*** The purpose of this project is to prepare 155 acres of unimproved industrially zoned property for future development, thereby creating employment opportunities and stimulating the economy.
3. ***Location:*** This project is located in the Lemoore Industrial Park southeast of State Routes 41 and 198.
4. ***Financing (Tentative):***

<i>E.D.A. (grant, loan)</i>	\$2,100,000
<i>City / RDA</i>	<u>1,400,000</u>
<i>TOTAL COST</i>	<u>\$3,500,000</u>

5. ***Economic Impact:*** We are seeking federal aid for the construction of streets, water and sewer lines, and a sewer lift station, and the undergrounding of a canal in the Lemoore Industrial park. This project consists of 155 acres of unimproved industrially zoned land, which is available for development. However, the property lacks the necessary infrastructure to be considered "buildable". Over half of the property, approximately 83 acres, is located behind other industrial development and lacks access. An additional 72 acres of unimproved land is located directly south of the 83 acres and would be able to tie into the City utilities as well, thus opening up a total of 155 acres for immediate development. The addition of streets, city utilities and access to property where a canal currently exists would cause these properties to rank much higher for developers seeking a Central California. This property is ideal for industrial development since it is located adjacent to State Route 41 and within a half mile of State Route 198. Without financial assistance, this property is cost prohibitive.
6. ***Job Creation Impact:*** Potentially over 350 new job opportunities will be created.
7. ***Priority:*** High. There are over 155 acres of unimproved, industrially zoned, land adjacent to State Route 41 that requires streets, water & sewer lines, sewer lift station and undergrounding a canal in order to attract business development. Interest in this area quickly disappears when developers learn that the property lacks the necessary infrastructure.
8. ***Are local funds available for a 50% match?*** The City of Lemoore meets the necessary requirements to receive funding at a 60/40 grant match. The City of Lemoore has local funds available for the required 40% match.

9. *Are plans and specifications available?* No.

Can plans and specifications be completed in 30 days? No.

Can plans and specifications be completed in 60 days? Yes.

10. *Are there any known environmental problems?* No.

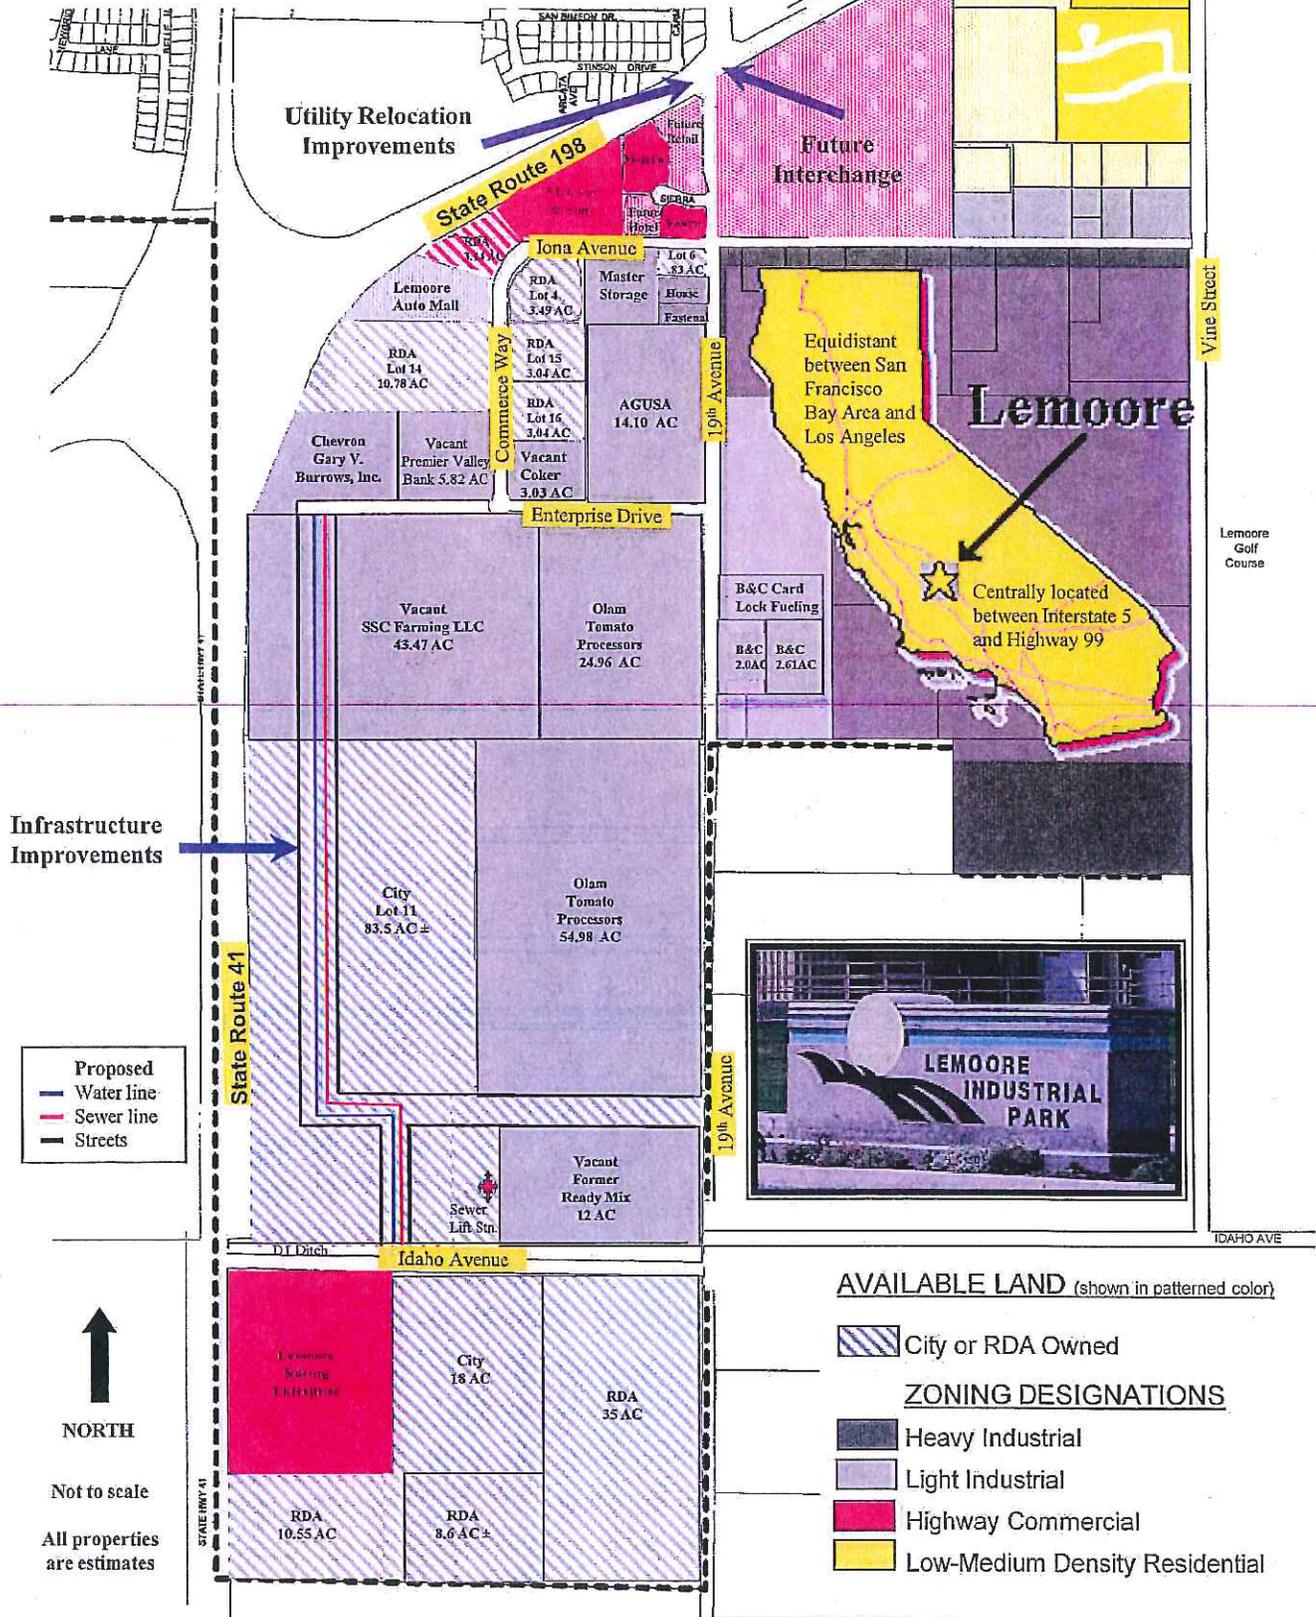

11. *Can the project go to bid in 90 days?* No, the project would take approximately six months to go to bid.

12. **Contact:** Judy Holwell, Redevelopment Project Manager
City of Lemoore, 119 Fox Street, Lemoore, CA 93245

Project: Venture Place Road Construction

Cost: \$270,000

Project Description:

This project proposes to divide Lot 14, which is currently a 10.78 acre parcel, into nine smaller parcels to create a Business Park in the Lemoore Industrial Park (map attached). There is currently an approved Tentative Parcel Map #2007-01(attached), which is valid until May 14, 2012.

<u>Project</u>	<u>Location</u>	<u>Improvement</u>	<u>Est. Cost</u>
Lot 14	Lemoore Industrial Park	Road for Business Park	<u>\$270,000</u>

Need for Project:

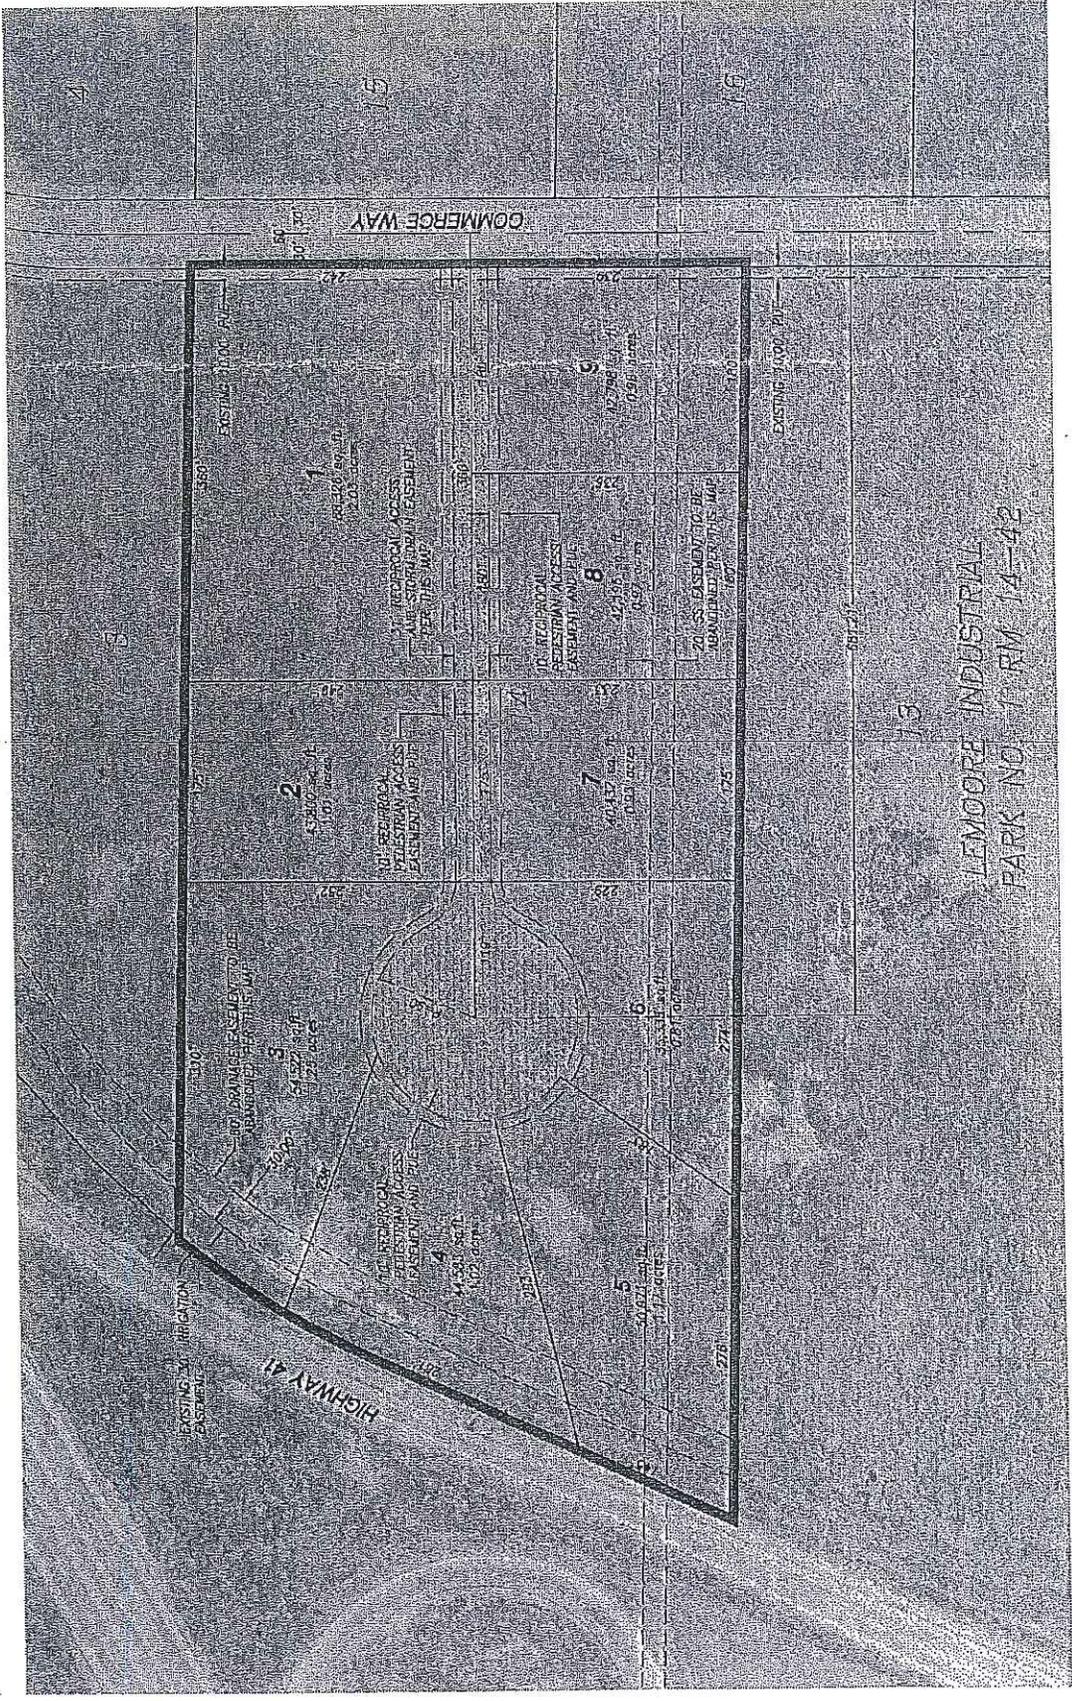

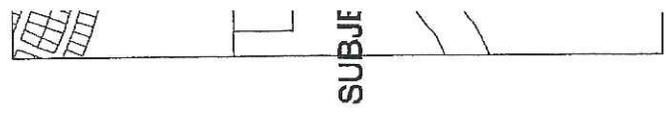

- Construction of this road would open up opportunities for small businesses.
- This project is necessary in order to access all nine lots. Currently, the large single parcel abuts Commerce Way and only two of the proposed smaller lots would have access.
- Passing this cost onto the remaining small businesses could be cost prohibitive for them.

Drawbacks:

- The parcel may be better suited as one large parcel rather than nine smaller lots. However, a developer could always purchase multiple parcels, if needed.
- Water, sewer and storm drain lines are not included in the estimated cost.

Recommendation:

Staff recommends that the RDA Board use \$270,000 in bond proceeds for this project.

LEGEND

— PUBLIC UTILITY EASEMENT

▬ LINE INDICATES PARCEL MAP BOUNDARY

Project: Underground Dockstader Ditch on Cinnamon Drive

Cost: \$460,000

Project Description:

The Dockstader Ditch is an open canal that runs along Cinnamon Drive between the Soccer Complex and Hill Street. A bridge crosses the canal at the entrance to the Cinnamon Municipal Complex (CMC). In order for the City of Lemoore Recreation Department to be fully relocated to the CMC, this canal will need to be undergrounded to allow for better vehicular and pedestrian access. Staff has submitted an application to the Community Based Transportation Planning Grant to pay for the engineering work involved in undergrounding this canal and installing curb, gutter, sidewalk, and bike lane. We should know this summer whether we have been awarded this grant. Staff is also working on an application to the Federal Safe Routes to School Program (SRTS) for the construction of the sidewalk, curb, gutter, and bike lane. The undergrounding of the canal itself is not eligible for these funds. The application is due July 15 and we should find out if we are awarded this grant in the fall. The canal undergrounding portion is approximately \$243,000

Need for Project:

- This open canal is a safety concern for people walking along it, in particular children trying to jump across the canal to get to the CMC.
- This open canal currently limits access to the CMC. This project will be needed if the Recreation department is to be relocated to the CMC.
- Alternative sources of funding are sewer/storm drain fees, which can be used for other projects such as the construction of a new wastewater treatment plant.
- This project would create a safer and more direct walking path for students traveling between Liberty Middle School and the CMC.

Drawbacks:

- Grant awards are undetermined as of today.

Staff Recommendation:

Staff recommends that this project move forward in three phases:

- 1 - RDA Board should commit \$243,000 to this project for actual canal undergrounding, which is not likely to be covered by any available grants
- 2- If grants are awarded, allocate necessary match funding (approximately \$26,000) for the engineering and design, and/or construction of the curb, gutter, side walk, and bike lane
- 3- If grant funds are not awarded, commit an additional \$215,000 for the above engineering and construction.

Project: Security Cameras at the Cinnamon Municipal Complex (CMC)

Cost: \$150,000

Project Description:

This project includes the installation of a video surveillance system at the City of Lemoore's Cinnamon Municipal Complex (CMC) for the purpose of protecting inventory and monitoring access of the building.

Need for Project:

- The City of Lemoore possesses valuable equipment and materials at the CMC, including vehicles, equipment, and tools. There have been many instances of vandalism and theft in the past. With a number of persons knowing the gate code for various reasons, it is difficult to investigate any thefts.
- The surveillance system would also monitor the time at which employees arrive to and leave from work.
- The General Fund is the only other source of funding for this project.

Drawbacks:

- The system would also require staffing hours to review tape in the event of incidents of theft, property destruction, and accident or injury, but will not be monitored on a continual basis.

Staff Recommendation:

Staff recommends that the RDA Board approve the use of bond proceeds for this project.

Project: ADA Sidewalks throughout Project Area

Cost: \$890,695

Project Description:

According to the Americans With Disabilities Act, the City of Lemoore is required to pursue a Transition Plan that will bring all City facilities into compliance with applicable disability access codes. Many miles of City sidewalks and hundreds curb cuts currently do not meet ADA standards. There is currently no particular funding source dedicated to mitigating these issues, which is anticipated to cost tens of millions of dollars. This project is the most flexible in its funding amount since it is composed of many small projects. For this reason, staff reduced the amount to \$890,695 instead of the originally proposed \$2 million to utilize the remainder of the bond proceeds. In the event that the other projects increase or decrease in their costs, the funding for the ADA sidewalk improvements can change accordingly.

Need for Project:

- Using RDA bond proceeds to pay this engineering and construction has the potential to alleviate some of the burden brought on by this unfunded Federal mandate.

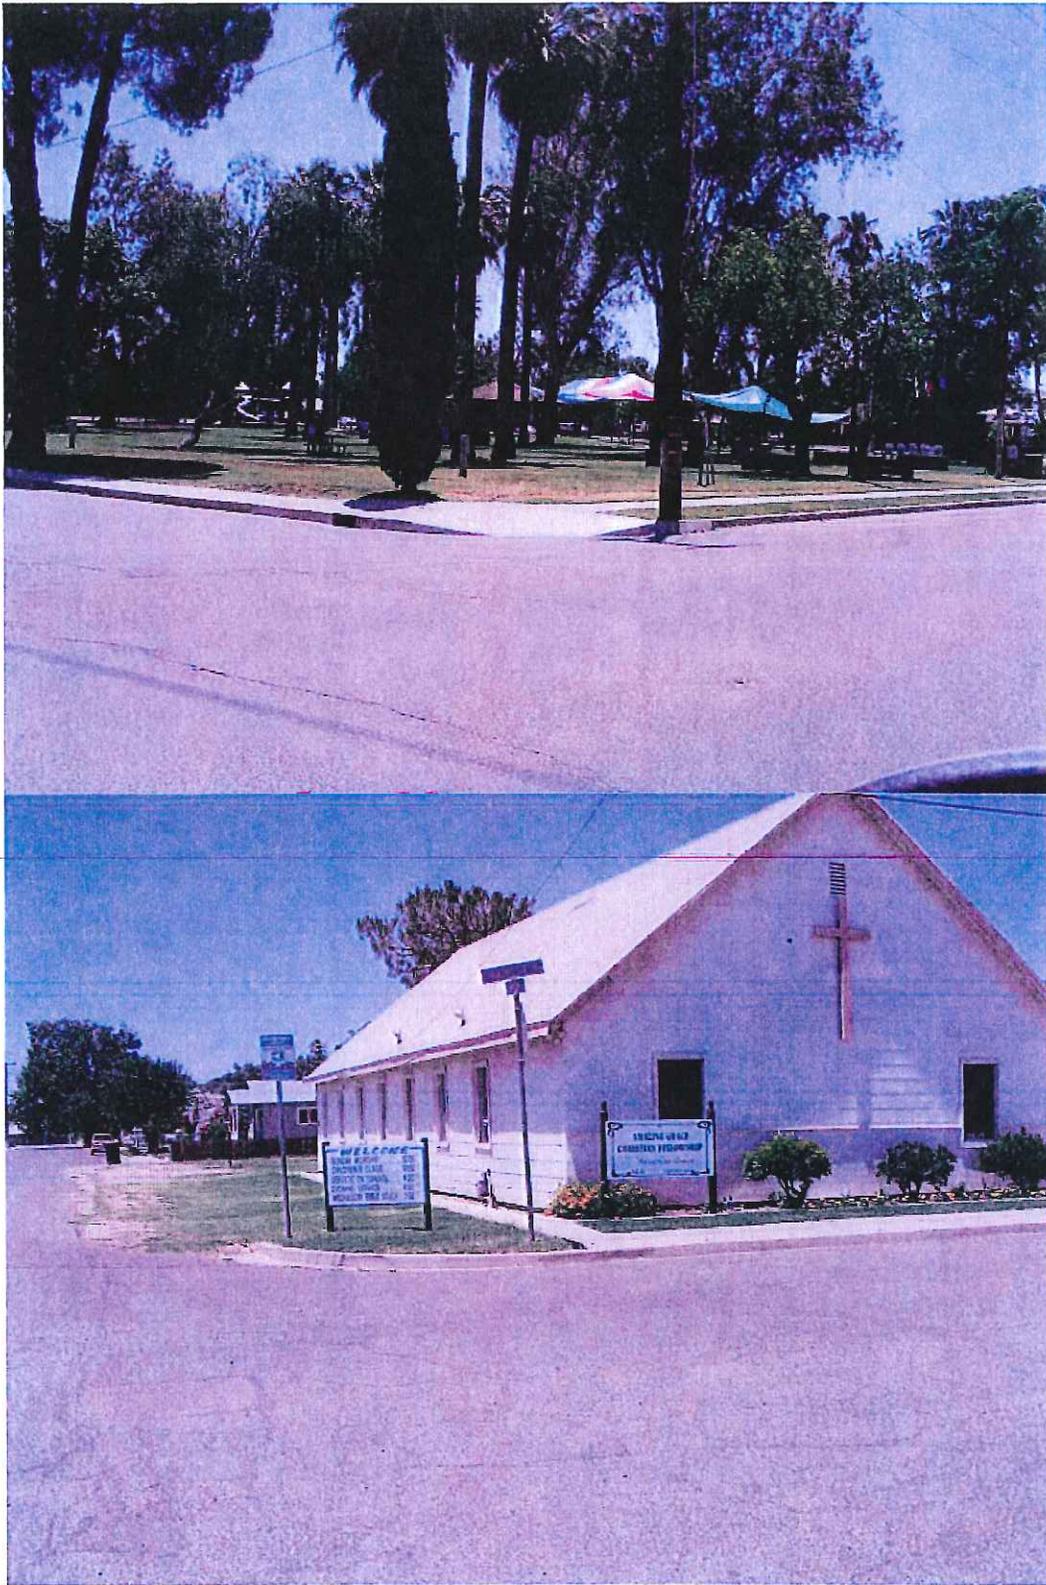

Drawbacks:

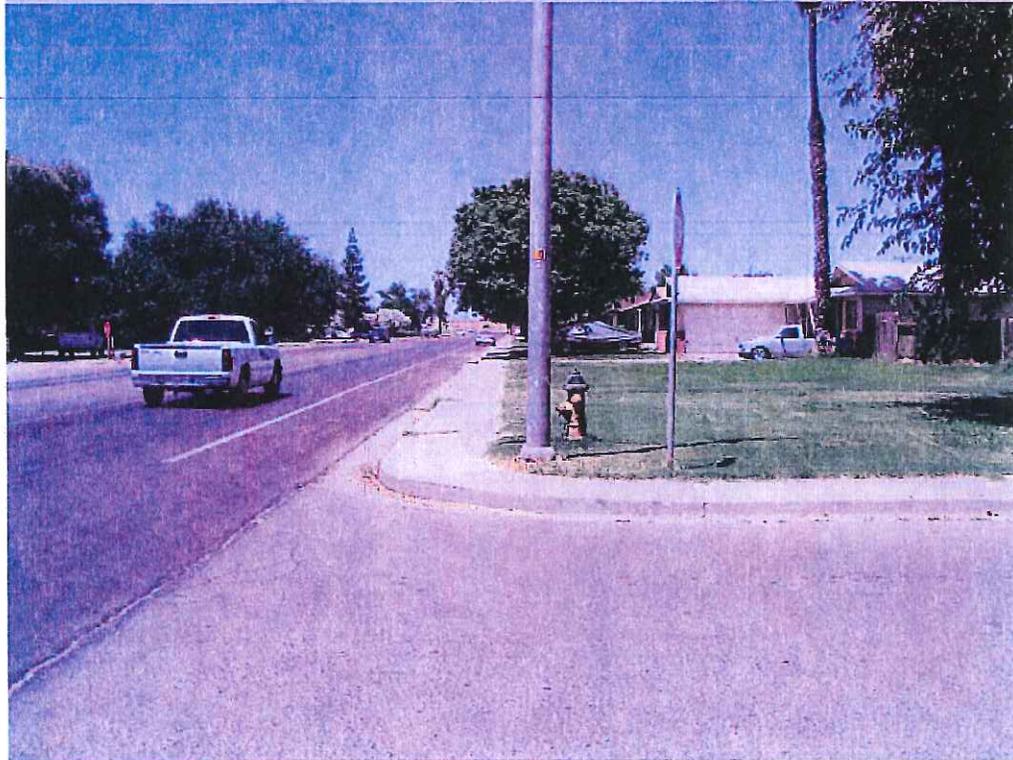

- Due to the nature of the existing infrastructure, costs of mitigation can vary significantly amongst the same type of mitigation. Replacing curb ramps can range in cost from \$3,500 to 4,500 each. Focusing on curb ramps alone, \$890,695 should be able to replace up 250 of them within the project area. However, repairs to adjoining sidewalks will likely reduce this number significantly.

Staff Recommendation:

Following the priorities adopted the Lemoore City Council as part of the City's Americans With Disabilities Act Transition Plan, dedicate \$890,695 to survey, engineer, demolish non-compliant, and construct as many compliant sidewalks and curb cuts as possible within the RDA Project Areas. Adjust this amount accordingly as other projects costs are more accurately calculated.

Project: Entrance & Wayfinding Signage**Cost: \$175,000****Project Description:**

The 2030 General Plan recommends the placement of five signs to create several gateways into our community as shown in Exhibit A attached. These signs will serve as identifiers as travelers drive north and south on Highway 41 and east and west on Highway 198. The specific location of the signs will be determined upon property owner approval and public right-of-way or easement. It is recommended that a wayfinding sign at Gateway Entry 2, at the SR 41 off ramp at Bush Street, be erected to direct visitors to our local businesses and points of interest.

A discussion was held during a Study Session on April 5, 2011 regarding a preferred design. Council instructed staff to modify the designs presented and return at a future meeting to review and potentially approve a design. The Redevelopment Agency Budget includes \$100,000 for public signage, which may be enough to construct the four entry signs. The wayfinding sign, however, is proposed as a sign structure with an LED display, which would serve to announce upcoming events to residents and visitors. The display would significantly increase the cost of the structure and could cost as much as \$75,000. The total cost for the five signs, including construction, lighting, footings and installation, is estimated at \$175,000. The signs should last well over 20 years with minimal cost to maintain.

<u>Project</u>	<u>Location</u>	<u>Est. Cost</u>
Entry Sign	Gateway Entry 1 – SR 198 @ Houston Ave.	\$25,000
Entry Sign	Gateway Entry 3 – SR 41 @ Hanford/Armona Rd.	\$25,000
Entry Sign	Gateway Entry 4 – SR 41 @ Idaho Ave.	\$25,000
Entry Sign	Gateway Entry 5 – SR 198 @ Marsh Dr. (21 st Ave.)	\$25,000
Wayfinding Sign	Gateway Entry 2 – SR 41 @ Bush St. (near off ramp)	<u>\$75,000</u>
		<u>\$175,000</u>

Need for Project:

- Adding entry signs along SR 41 and SR 198 will identify Lemoore to travelers as they pass by while driving to and from the Central Coast, Yosemite, Interstate 5 & SR 99.
- Adding a wayfinding sign with an LED display will help direct residents and visitors to our local businesses and points of interests and alert them to events taking place in the community

Drawbacks:

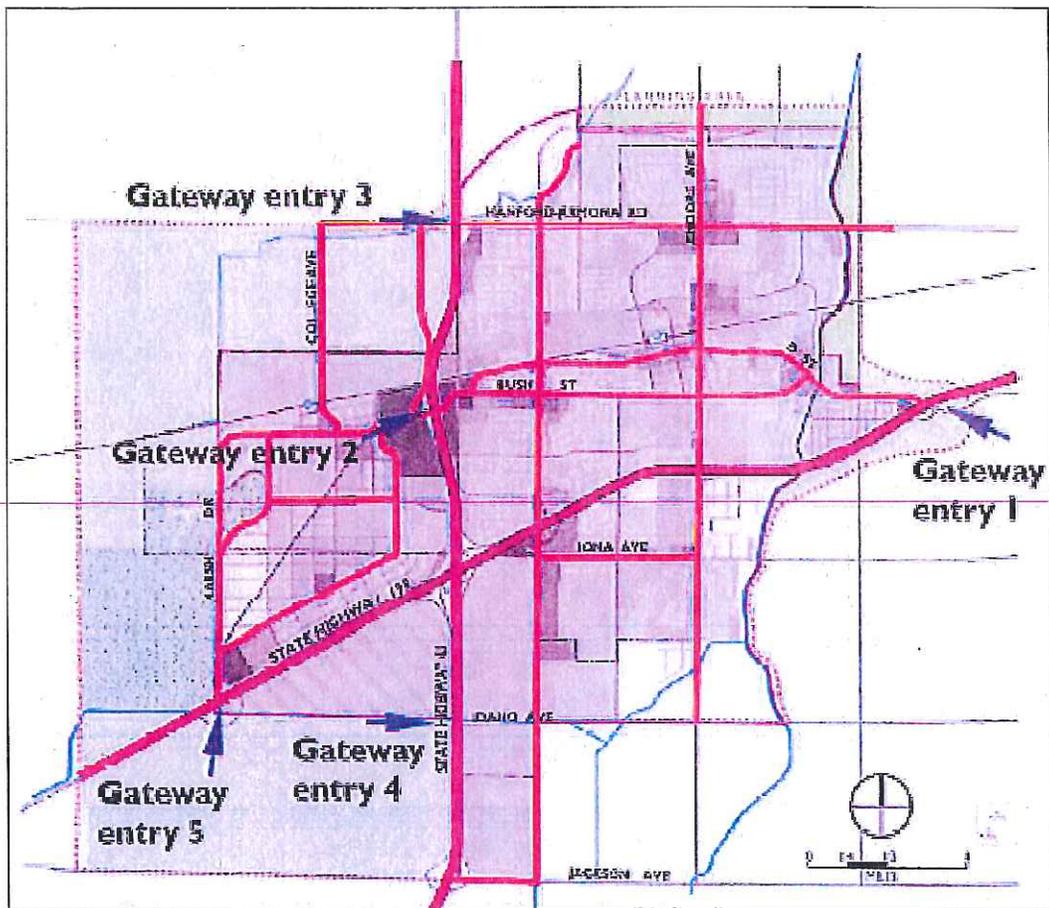

- Currently the City/RDA only has control of one of the proposed sign locations.
- Costly one-time expense.

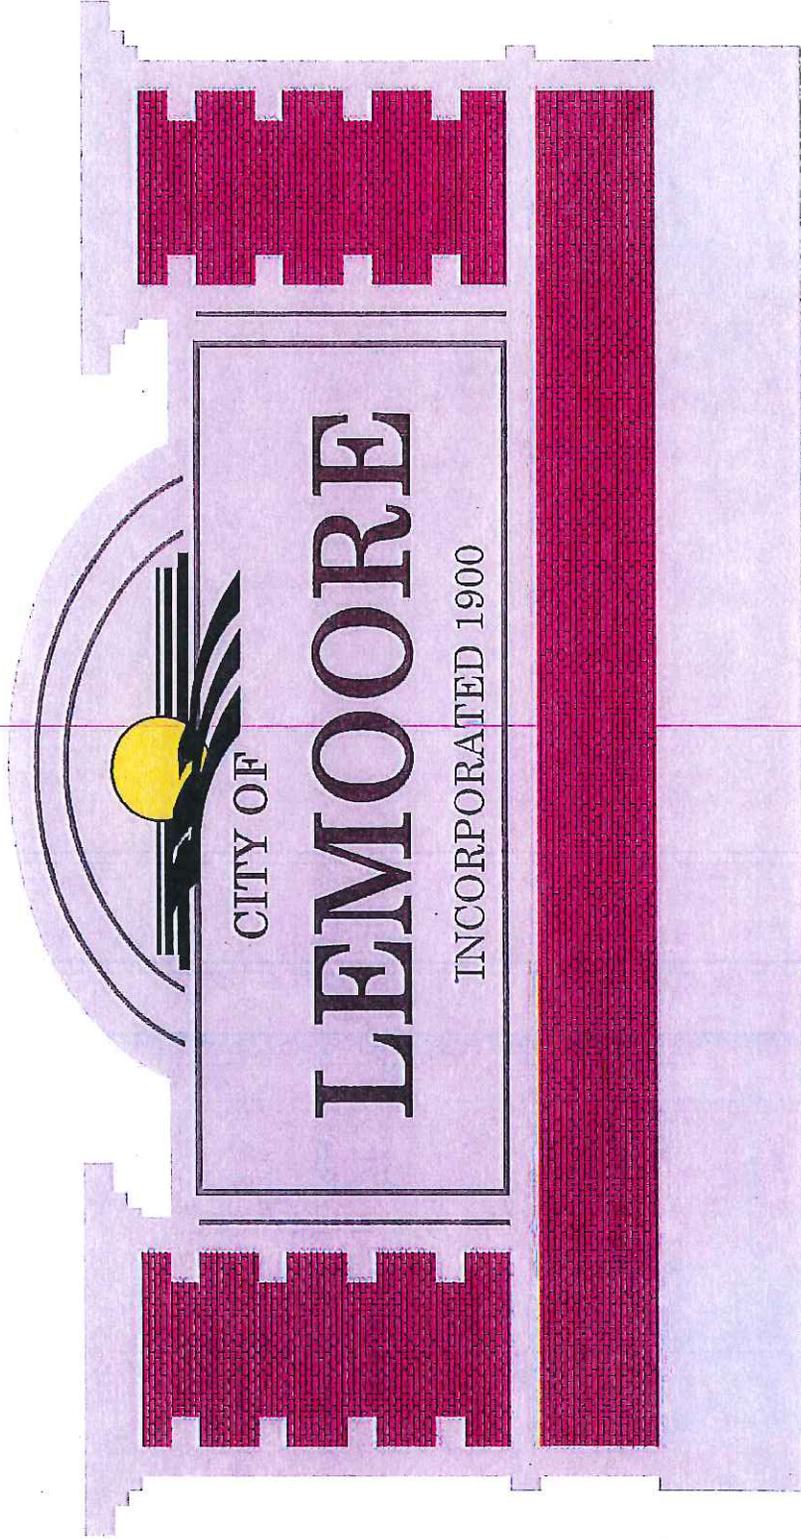

Recommendation:

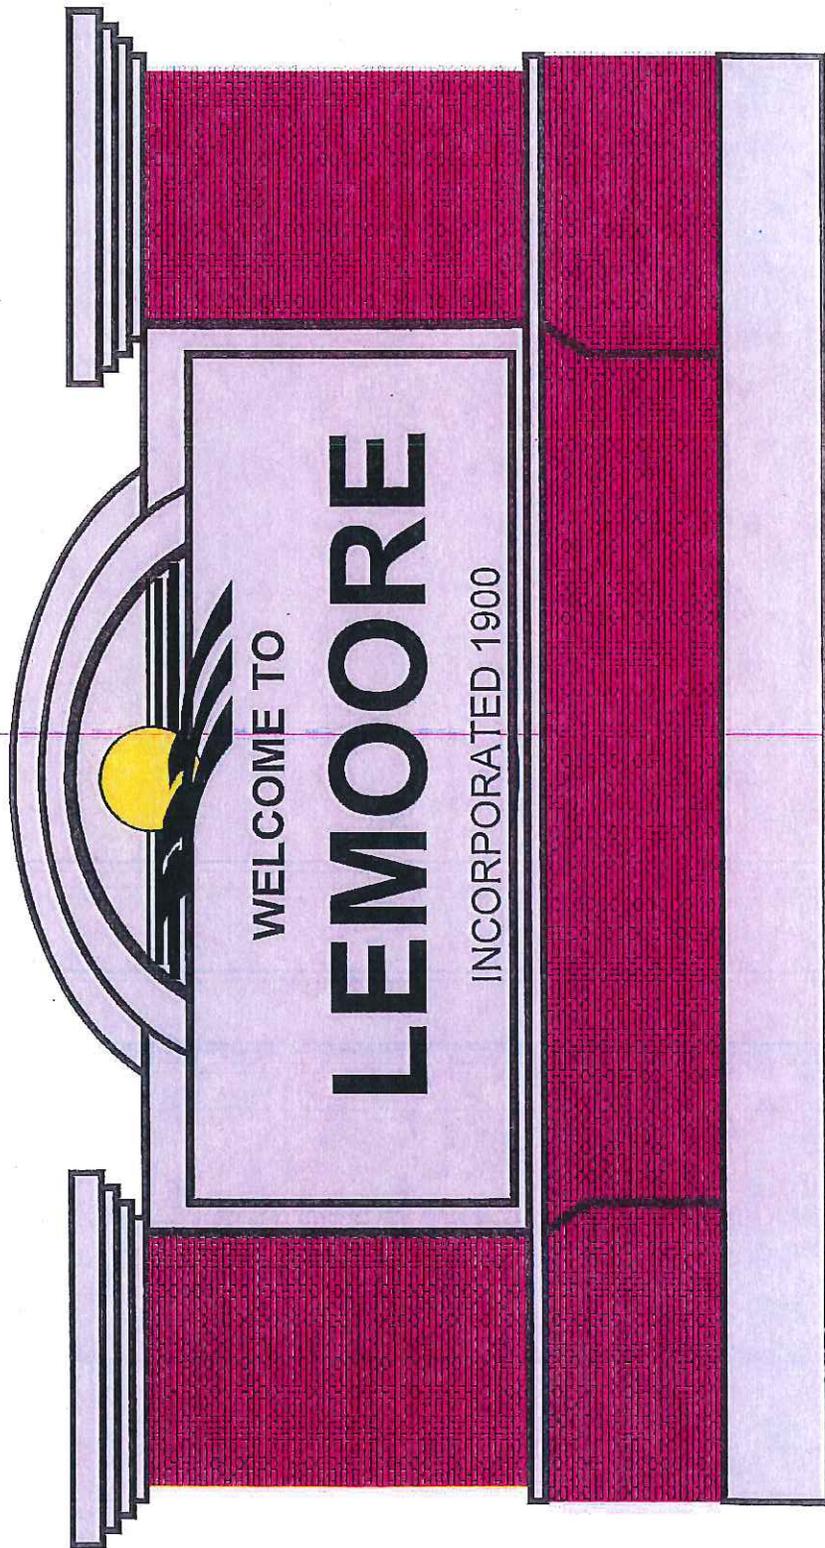

Install five signs at the proposed Gateway locations using \$175,000 of bond proceeds.

2030 General Plan

Chapter 3: Community Design – Figure 3-4 Gateway and Entries

WELCOME TO

LEMOORE

INCORPORATED 1900

Project: Downtown Irrigation, Electrical & Brick Stamping Cost: \$1,000,000

Project Description:

This project proposes to add irrigation and electrical to the Downtown area (map attached). In doing so, trees would be replaced where needed, tree grates would be installed, sidewalks would be enhanced – resulting in new streetscape, brick stamping would be added throughout, string lights in trees would be replaced with uplighting from tree grates, and all curbs would become ADA compliant. The Lemoore Downtown Architectural Design Guidelines recommend these improvements to beautify the area and create a cohesive Downtown street environment. If the Board determines that this project should proceed, an architect/engineer would be hired to design the improvements and calculate the costs. A very rough estimate of what such improvements may cost is approximately \$1,000,000.

Need for Project:

- Adding these improvements will enhance the landscaping, lighting, and sidewalks in the Downtown area.
- String lighting in the trees is high maintenance due to lights not working, persons tampering and pulling on them, and theft.
- Plants, trees, and flowers in the Downtown flowerbeds often die due to insufficient or lack of irrigation system.
- Improving the appearance of our Downtown will lead to greater attraction of businesses and patrons.
- Curbing in the Downtown area needs to be ADA compliant.

Drawbacks:

- Costly one-time expense.

Recommendation:

Staff recommends using bond proceeds for this project.

Project: Idaho Water Line Extension

Cost: \$200,000

Project Description:

This project proposes to extend the existing public water line along Idaho Avenue. The water line currently runs down 19th Avenue and ends at Idaho Avenue. This proposed project would construct a water line from the end of the current water line at 19th Avenue westward towards Highway 41, serving approximately 140 acres of property in the Lemoore Industrial Park.

Need for Project:

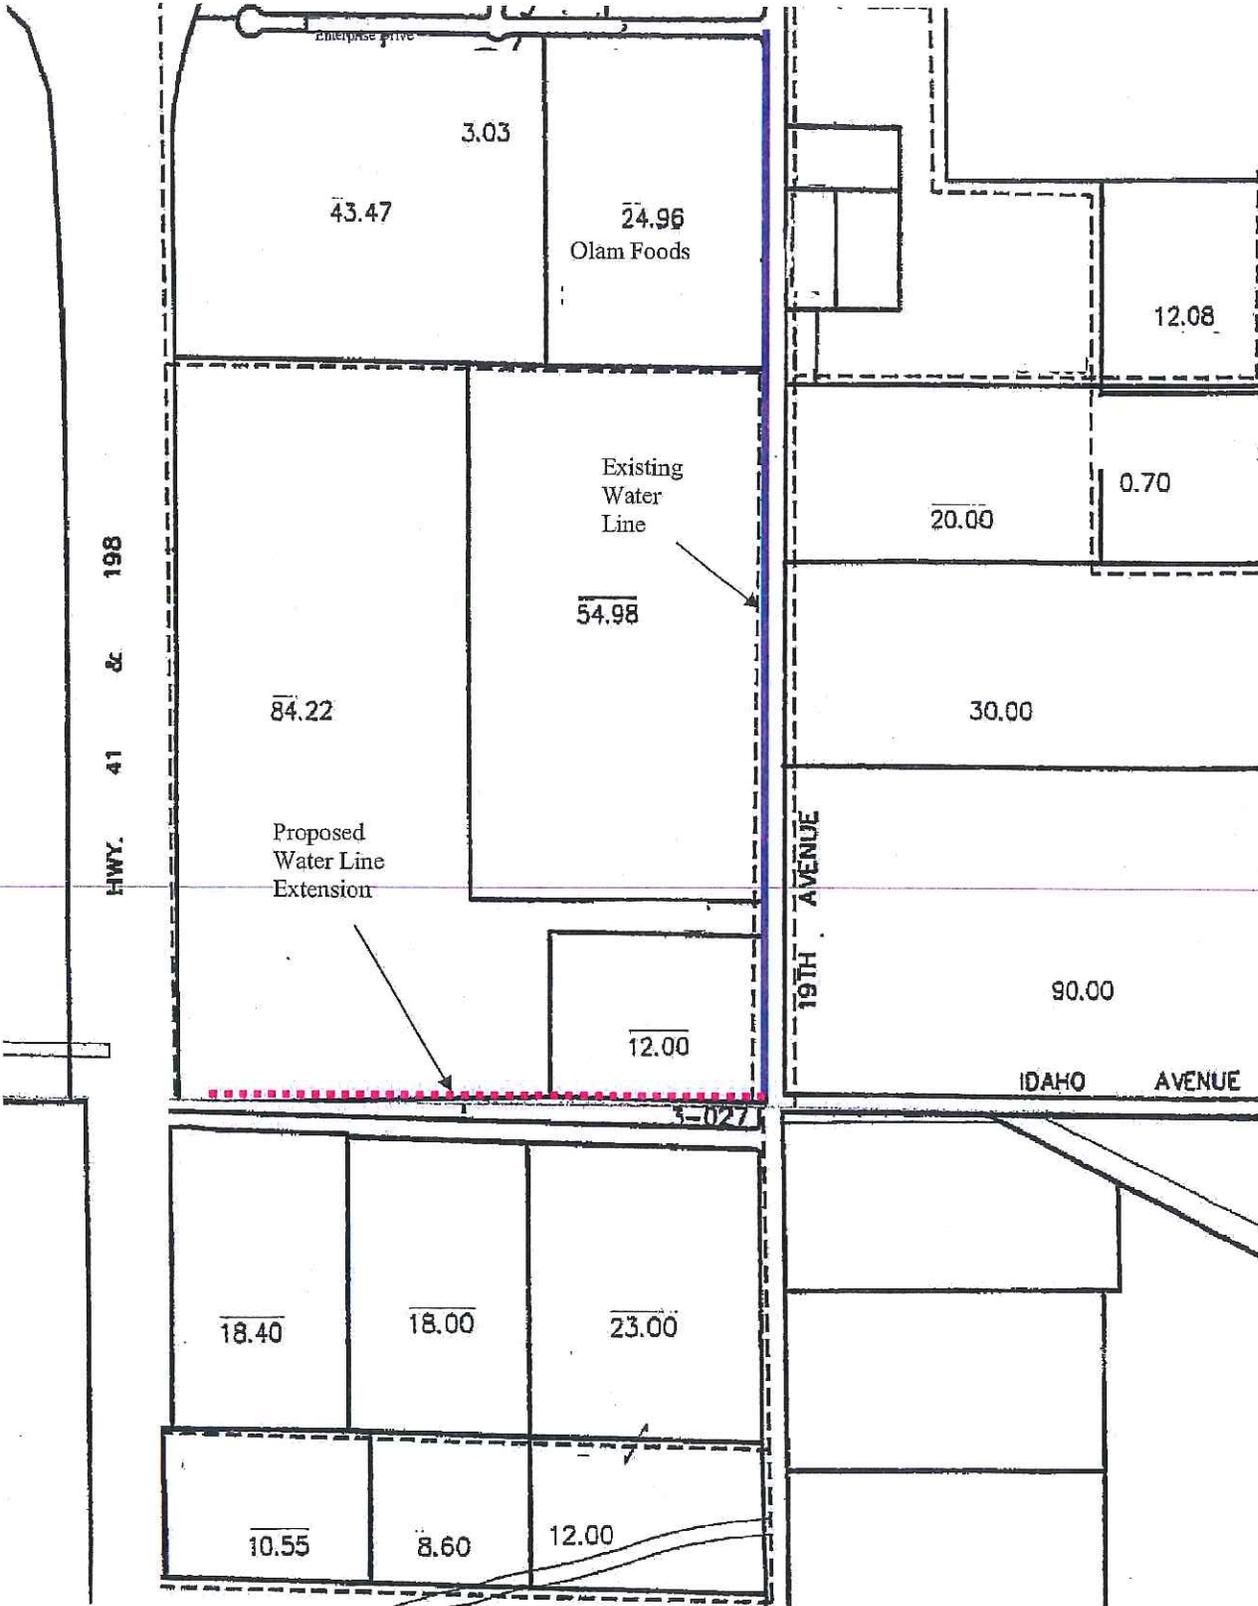

- This project would serve an additional 140 acres of property with water service in the Lemoore Industrial Park, perhaps attracting businesses.

Drawbacks:

- The current line along 19th Avenue, south of Olam Foods, often has standing water due to lack of demand. Bacterial growth often accompanies standing water, and without any demand along Idaho Avenue, it is likely the newly constructed water line would have the same concerns.

Staff Recommendation:

Staff recommends that the RDA Board not use bond proceeds to pay for this project, because it is not needed at this time.

Project: Create Cooling Center at Senior Center by adding Solar Panels Cost: \$400,000

Project Description:

Previously, Council has discussed the option of paying for the installation of solar panels for the Lemoore Senior Center to help lower their energy costs, and using the Senior Center as a public cooling center in exchange.

Need for Project:

- The City currently recommends using available public buildings, such as the Kings County Library, as make-shift cooling centers during normal operating hours. These buildings are not operated in the evening hours.

Drawbacks:

- The Lemoore Senior Center has expressed interest in receiving solar panels to offset their electricity costs, but has never expressed interest in running a cooling center to the necessary level in exchange.
- A cooling center needs to be run mainly in the afternoon and evening, and the Lemoore Senior Center is currently only open in the mornings, and only 4 days per week.

Staff Recommendation:

Staff recommends that the RDA Board not use bond proceeds to pay for this project due to the challenges that operating a cooling center presents to the Lemoore Senior Center.

Project: Expand Front Parking Area at Cinnamon Municipal Complex **Cost:** \$450,000 or \$225,000

Project Description:

The parking area in front of the Cinnamon Municipal Complex (CMC) currently holds approximately 22 vehicles and the employee parking on the side of the building holds 55 vehicles, but is frequently full between the weekday hours of 7AM and 4PM. While this parking is sufficient for current operations at the CMC, it will not be adequate if the Recreation Department relocates to this building. The parking lot will need to be expanded to accommodate the additional activities at the CMC.

The parking lot expansion has two options. The first is anticipated to cost \$450,000, which includes engineering and design, landscape and tree removal, paving and grading and adding 185 additional spaces for a total of approximately 262 parking spaces. The second option is anticipated to cost \$225,000 and provide an additional 58 spaces for a total of 135 parking spaces. Both options include the appropriate number of handicap spaces, a 6-foot side walk from Cinnamon Drive to the parking lot, parking lot landscape curbs, light poles, and landscape and irrigation.

Need for Project:

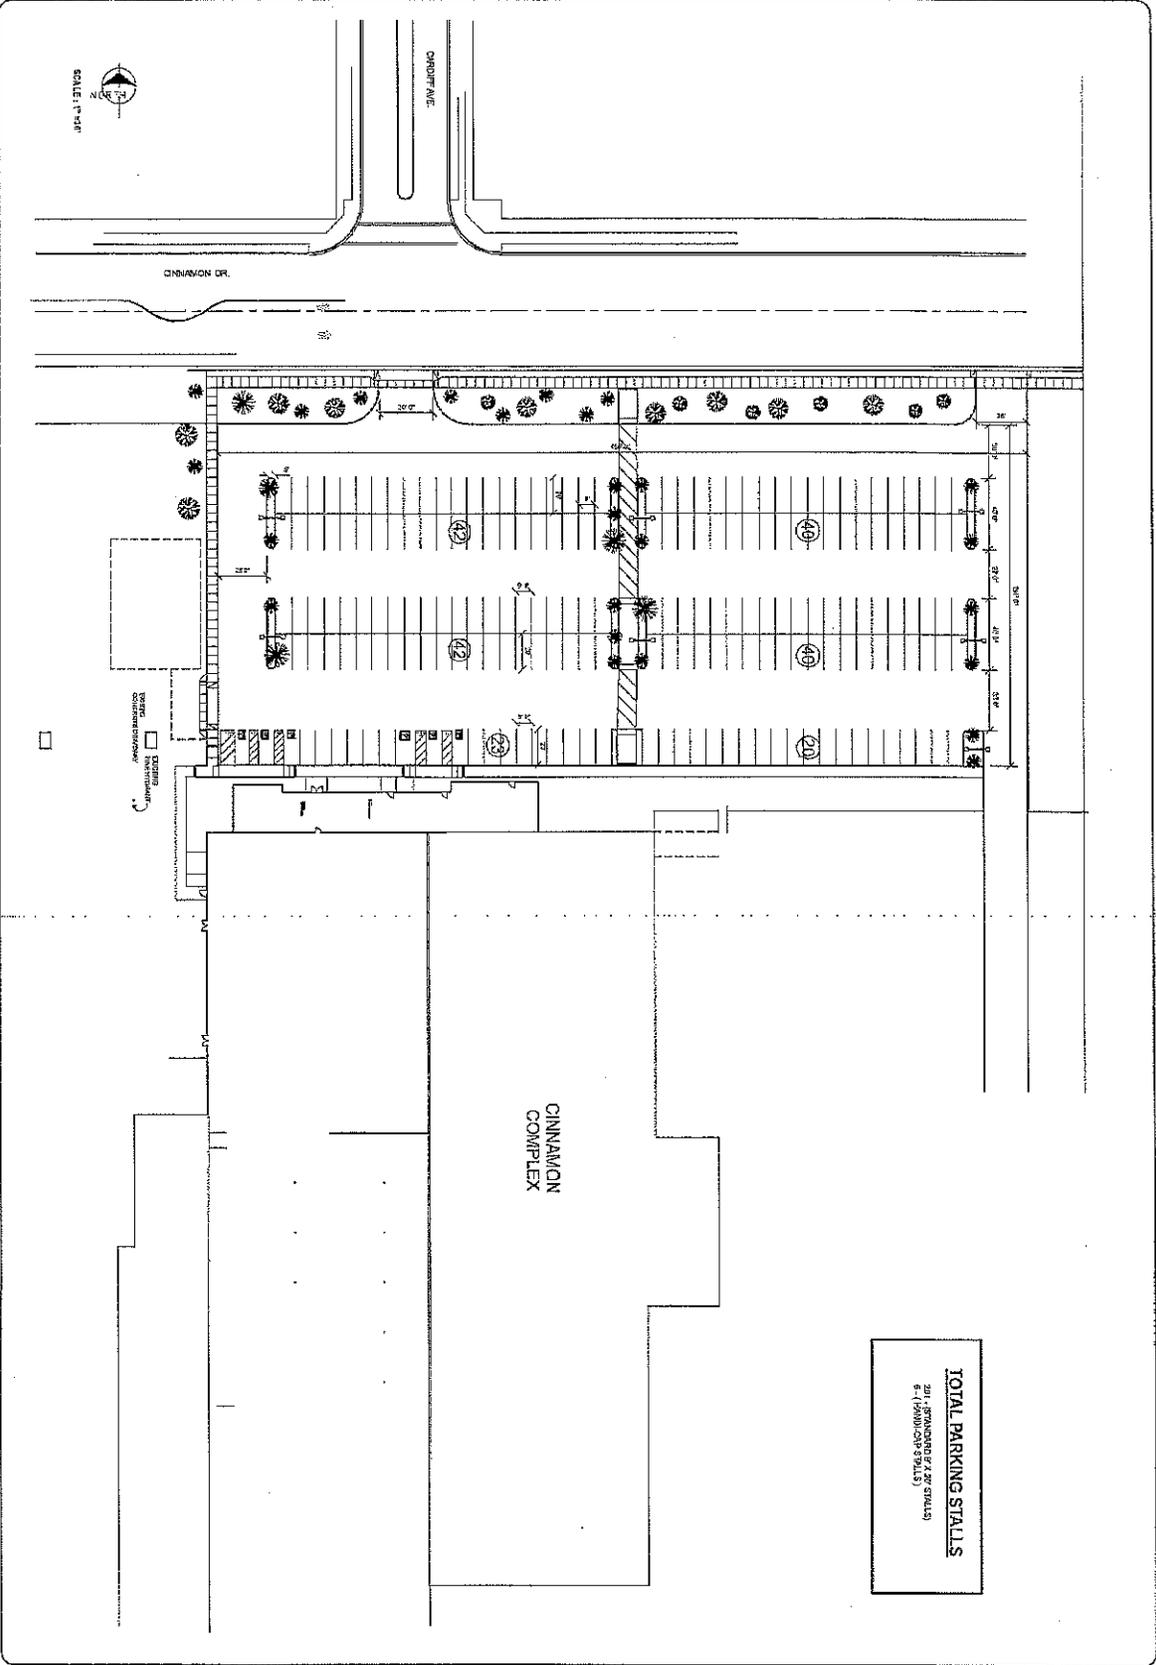

- This project will make it easier for the relocation and expansion of the Recreation Department to the CMC to take place

Drawbacks:

- This could be paid for out of impact fees because it is growth related. The Recreation Facilities impact fee account currently has a balance \$502,000 and the General Municipal Facilities impact fee currently has an account balance of 524,000.
- The first option provides an additional 185 spaces that are not necessary now or in the near future. The second option which creates 58 spaces meets our needs much better.
- There is additional maintenance cost associated with expanding this parking lot, including lighting, asphalt maintenance, and landscape maintenance.

Staff Recommendation:

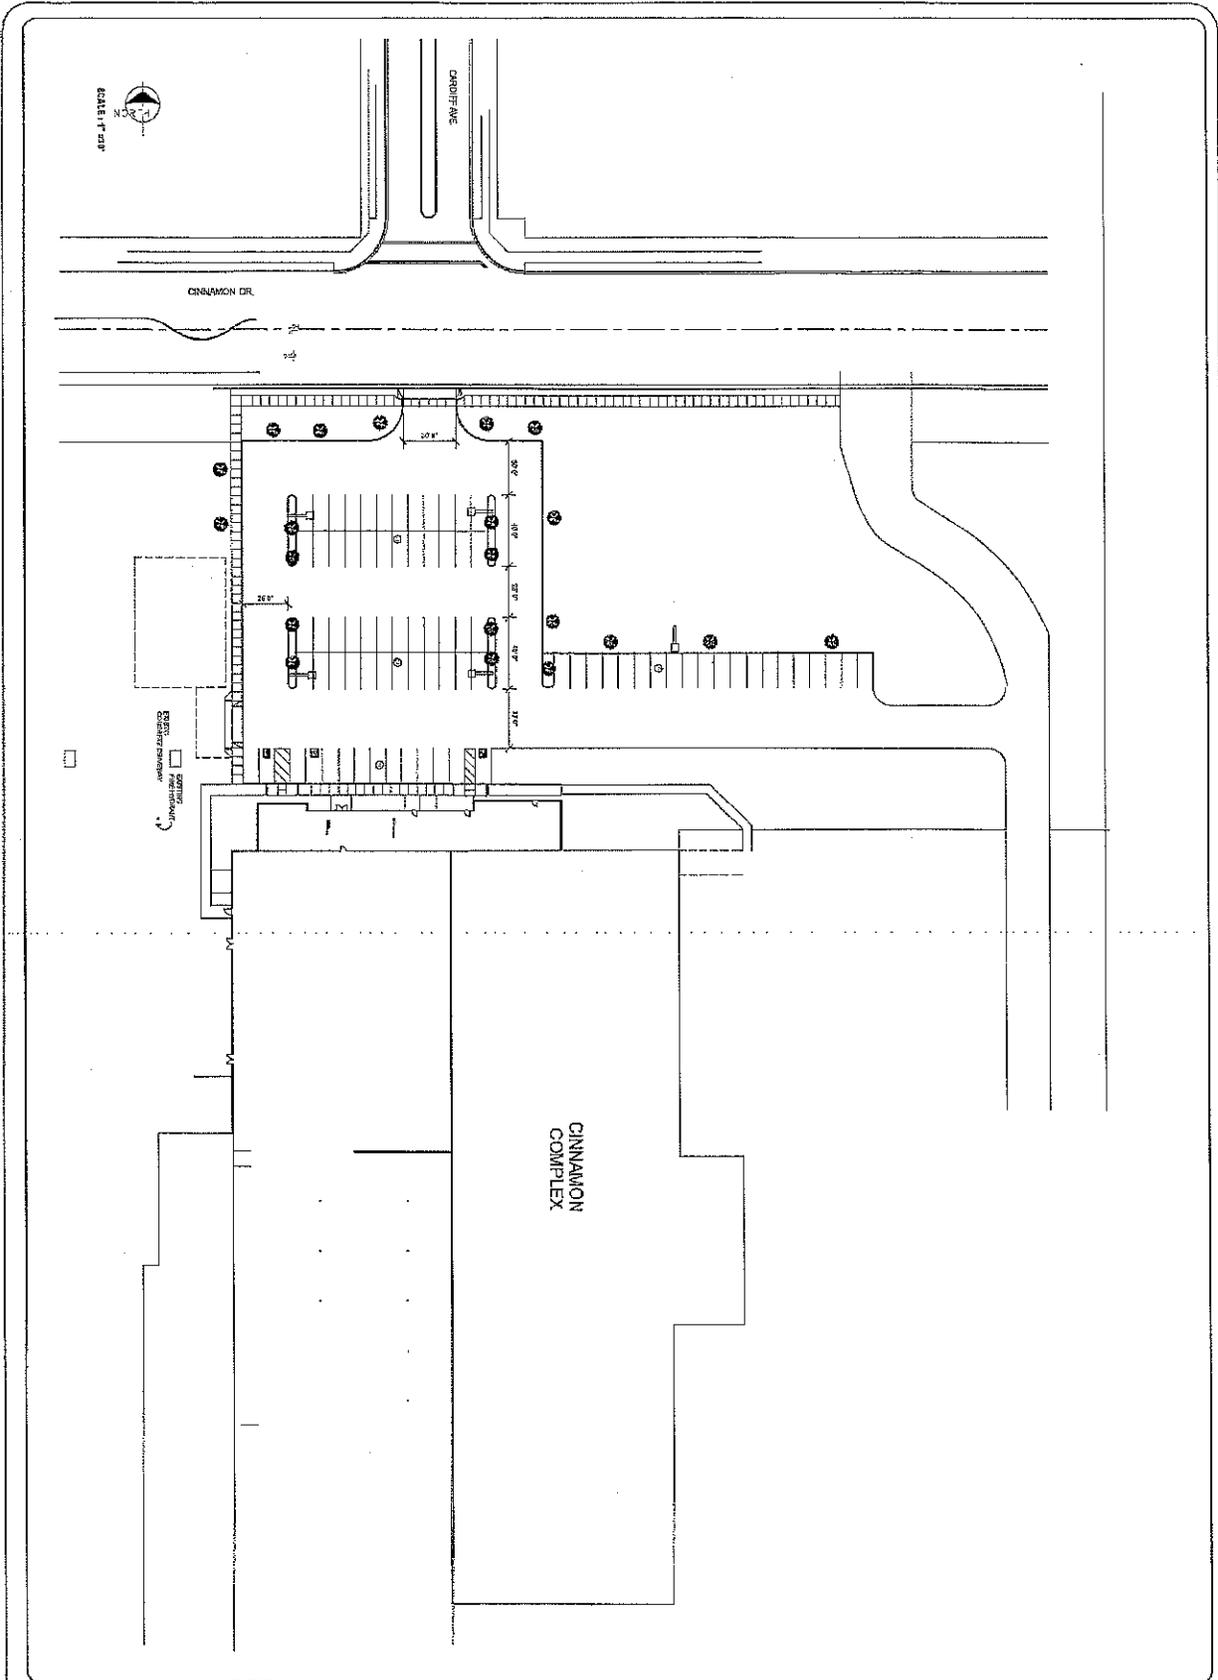

Staff recommends that the RDA Board not proceed with this project, and instead the City proceed with the \$225,000 project using impact fees.

Project: Relocate Recreation Offices to CMC

Cost: \$400,000

Project Description:

In prior discussions, Council has shown an interest in relocating the Recreation and Planning offices to the Cinnamon Municipal Complex (CMC). As there is not enough office space to accommodate these departments now, new offices will need to be constructed in the warehouse area of the building to accommodate existing Public Works staff. The \$400,000 cost will create approximately 5 new offices, a new restroom, copy room, conference room, and break room on the east side of the building, where Public Works staff and Planning staff will be located. The Recreation Department will occupy the west side of the building, and create a new public entrance for recreation customers.

Need for Project:

- This project will allow developers one-stop access to both the Building Department and Planning Department.
- This project allows for better utilization of the recreation facilities at the CMC by having staff permanently located in the building.

Drawbacks:

- This could be paid for out of impact fees because it is growth related. General municipal Facilities impact fee account currently has a balance \$524,622.

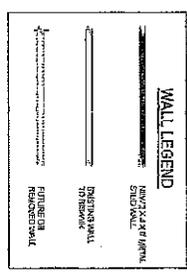

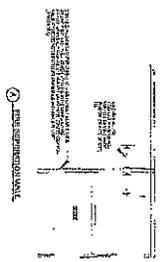

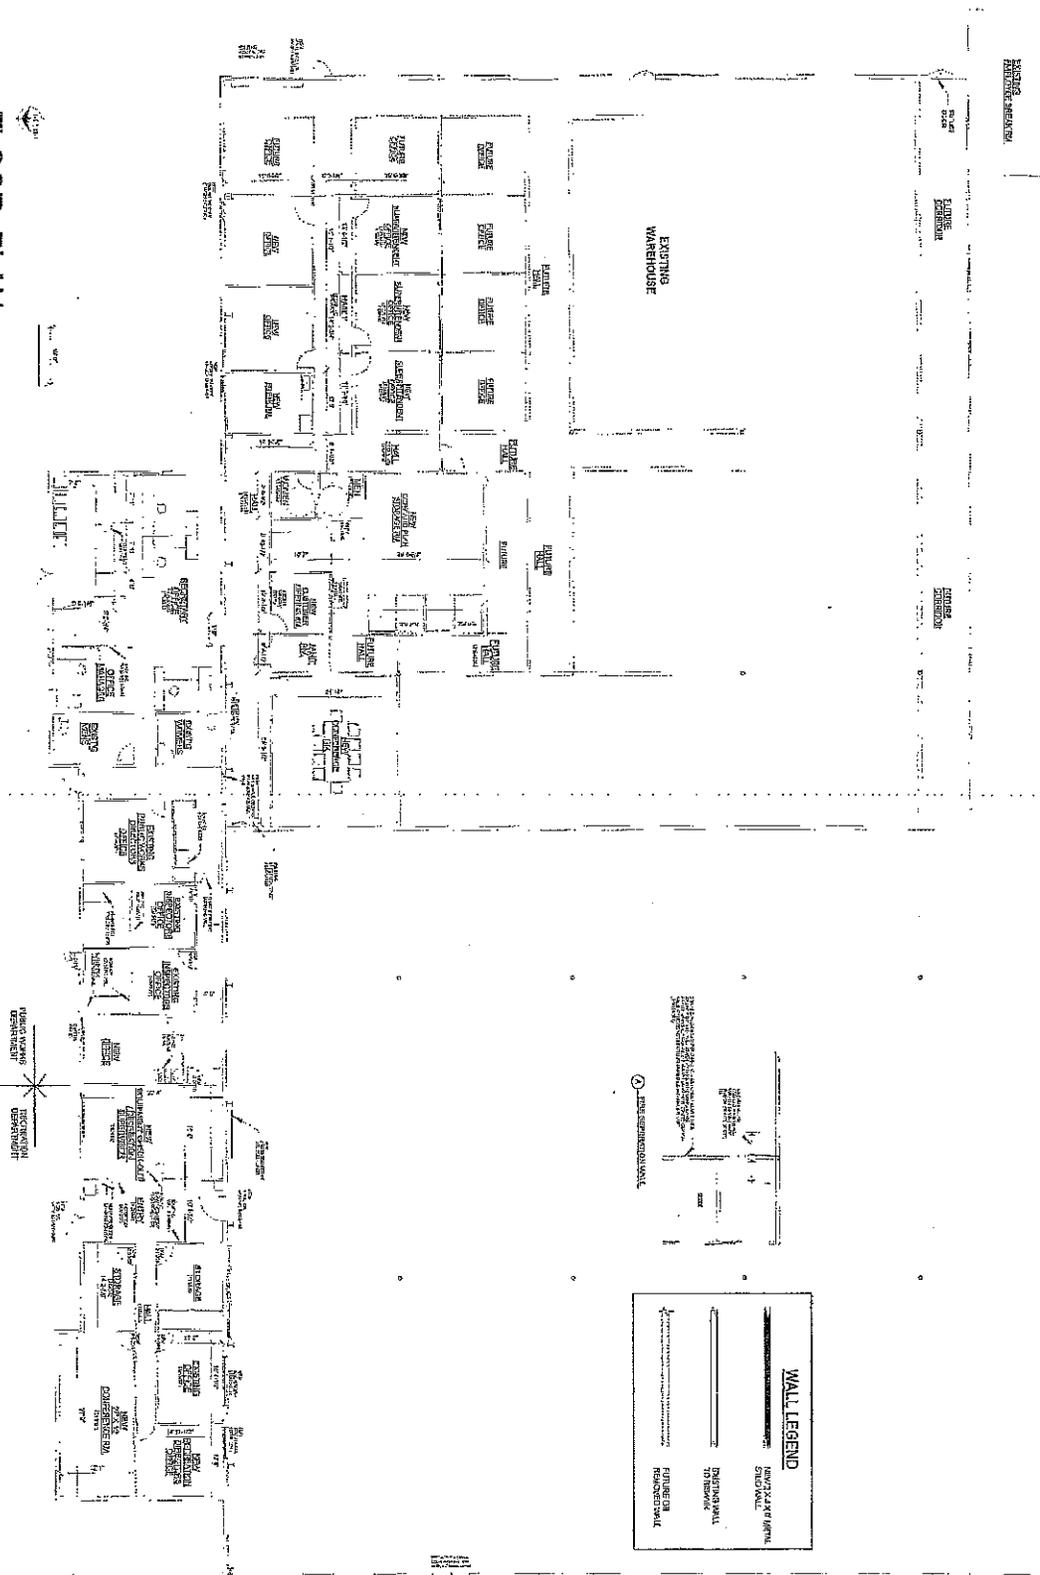

Staff Recommendation:

Staff recommends that the RDA Board not use bond proceeds to pay for this project, and instead use impact fees.

To: Lemoore Redevelopment Agency Board SS Item # 3
From: Jeff Brittz, Executive Director
Date: April 15, 2011
Subject: Uses of Proceeds from 2011 Tax Allocation Bonds

Discussion:

As the Board is well aware, the Agency issued \$19,150,000 in Bonds, which closed on March 4, 2011. This issuance created \$16,619,066.99 in funds for projects, of which at least 20% must be spent on Low/Moderate Income Housing projects.

Back in early February, the Board narrowed the Low/Moderate Income Housing projects contemplated to be funded by the bond proceeds, but elected to list a litany of possible non-housing projects in the Official Statement to provide additional flexibility later on. In an effort to begin using the bond proceeds, and budget for projects, I sent out to Board Members a request that you individually prioritize the projects. I have since received your individual priorities, and other comments, including the attached memo from Board Member Gordon.

Staff has combined the priorities received on the attached spreadsheet. On Tuesday, I am seeking consensus from the Board on which projects you would like staff to begin working on initially. Please keep in mind that Bond holders have an expectation that the proceeds will be spent within three to five years. Recall that we expect \$13.3 M to be available for non-housing projects.

Finally, since many of the projects tentatively listed will require engineering services, particularly the wastewater plant improvements, I have asked City Engineer Harry Tow to attend Tuesday afternoon's Study Session to address a couple of pertinent issues. He may also be able to answer other questions that you may have on these projects.

Budget Impact:

\$13.3 M is available for non-housing projects from the 2011 Tax Allocation Bond proceeds.

Recommendation:

At the conclusion of the discussion, staff seeks direction from the Board as to which projects to begin working on.

April 13, 2011

TO: Fellow Lemoore City Council Members
FROM: John Gordon
RE: Allocation of Redevelopment Bond Funds

I cannot rank a list of projects as Mr. Britz asked us to do. I believe the task requires more subjective input.

My number one priority is funding a waste water treatment facility that meets the City's and Leprino's needs for the next 20-30 years. Leprino brings high paying jobs into our community and we should everything possible to promote their expansion. Also, the number one complaint I received while campaigning door-to-door was that city services are too expensive. So, I believe we must work to keep the cost of living down in our town.

Second, we should utilize the Cinnamon Municipal Complex to its greatest extent possible since we already own the asset. Creating a central location for city services makes things convenient for our citizens and will hopefully improve inter-department communications. Therefore, we should fund all projects connected with relocating Planning and Recreation to the CMC. In addition, we have a huge demand for soccer fields as you will notice by looking at the City's tennis courts and basketball courts in the evening. Other cities have successfully put together indoor soccer fields and I hope we can do one in the CMC. By the way, the soccer field is currently not listed with the other bond projects.

Third, it is very important to fund the configuration and dispatch center at our Police Station. The State is releasing prisoners early due to their budgetary shortfall and putting strain on police departments. Plus, the continued poor economy leads to more criminal activity. So, we must make sure our police department can perform at its greatest ability.

Another consideration is to use city employees so that prevailing wage is not triggered on construction projects. We already have a licensed contracted on staff who is very experienced. The city of Lindsey used this to their advantage when they built their recreation center.

Two final items: 1. I hope we do something with the lot on the northwest corner of E St. and Lemoore Ave. It would increase city blight if we allow that lot to become a tumbleweed farm. 2. Our city does not have a cooling facility or an enclosed mall for those that are heat sensitive in our town. Assuming we have cooperative leadership from the senior center, we could solve two problems by putting solar system on the senior center. It would eliminate the senior center's electric bill and make them more financially viable. Secondly, making it a cooling center would be convenient for the seniors that are already out there for the lunch program.

Note: Feel free to publish this memo.
