Lauren,

I have prepared preliminary budgetary cost estimates for the five crossings that we discussed last month during the field meeting. These are rough costs for the City to review and utilize for budget purposes. No detailed surveys or designs have been completed, so these estimated costs could vary. Please account for that when creating the Cities budget. Also these estimated costs are just for the Railroad portion of work to be paid by the City and does not include and any costs associated with the Cities portion of the work.

The Railroad has also reviewed the potential new crossing at Daphne Lane and the San Joaquin Valley Railroad will not consider a new crossing here unless an existing crossing in town is closed. The Railroad would need to approve which existing crossing the City would offer for closure. Please refer to the attached letter sent to the City in July 2011.

Estimates are attached for the following:

- North 19th Ave
- Fox Street
- Follett Street
- Lemoore Ave
- Daphne Lane

If there are any questions please do not hesitate to ask and I hope this will assist the City in moving forward with its plans for improving these railroad crossings.

Tony Cattedra
