

Mr. Mayor, City Council Members

I Dave Brown 89 Devon Dr would like to bring to the councils attention the problem concerning the traffic flow issues at the Devon and Lemoore Ave and at Follet and D Street intersections. These are two very dangerous intersections.

There was a bad traffic accident with pedestrian injuries at the Devon and Lemoore Ave Location last Friday. I live at 89 Devon just 4 houses west of the scene of the accident. My neighbors and I are very concerned about the traffic flow in this area. When traffic is at its peak and the patrons of the Saint Peters Church try and make a left turn to go South on Lemoore Ave and when you add the traffic from Cinnamon Plaza and AutoZone trying to turn North bound on Lemoore Ave and the Devon Traffic placed into the mix it becomes a very dangerous intersection.

The intersection of Follet and D Street is another dangerous intersection due to the parking on the North East Corner of D and Follet. When you are at the intersection facing south and try to cross D Street or try and make a left or right turn (when facing south) it is impossible to see if there are any oncoming traffic coming West bound on D Street.

I am asking that city council ask the planning department/commission to conduct a review of the traffic plans of these two areas and come up with some cost effective ideas to help mitigate/correct the traffic issues at these two locations. Then a recommendation be presented for action.

Thank you,

David Brown
