Dear Mayor Siegel and City Council,
Recently I went out to the disc golf area behind Heritage Park and I was totally disgusted. Money was spent to put in disc golf and trees. Is there not any money for the upkeep? There are so many weeds which the stickers are now in my car from my shoes. With the weeds equals way to many bugs. With the pond some is understandable, but there were way too many every step practically. The scenery is just as bad. Walking the trail there is weeds on the path, there are leaning fences, and one house on the east side has all the rear windows broken out. Even a purple condom ewww. The area is kind of isolated, so can you get it cleaned up. A person could be attacked in the weeds and not be seen. Since I am writing I thought I would mention other things I have seen in the city lately. Front yards appear to be becoming parking areas, fences look terrible, graffiti is not cleaned up, businesses have too many signs (as an ex business owner I was cited for this, why I am an ex business owner), the house that burned once by the high school never got completely rebuilt and is a fire hazard still. I have recently taken up jogging for my health. I have to go before dark because of lack of working street lights I don't always see the messed up curbs. I had the bruises to prove it. I know you are all busy people, but if you can look into these issues would be appreciated. I understand there is no longer a planning department

and code enforcement, but don't you have someone to deal with the City Codes?

Thanks you,

Joe Citizen
