Re: Cell Phone Forensics School

Lemoore City Council,

On 05/19/2014 Officer O'Barr and I attended a week long Cellular Phone Forensics class hosted by the California Department of Justice. This week long class specializes in the field of mobile forensics and data recovery on phones and tablets. As our criminal element uses this technology to conduct, document, and brag about their illegal activities, it's imperative that we keep up abreast with the techniques and technology for obtaining this information.

At the completion of the class, Officer O'Barr and I received and XRY Cellular Forensic kit and other items which were valued about \$8,500.00. This kit has already been put to use as on our first day back to work, Officer O'Barr was needed to conduct an examination of a cell phone and tablet.

Respectfully submitted,

Corporal Mark Pescatore
