TO WHOM IT MAY CONCERN

Leprino Foods manufacturing facilities are constructed and maintained in accordance with the Federal Food Drug and Cosmetic Act's provisions for current Good Manufacturing Standards. The provisions set forth in the Code of Federal Regulations Part 110.20 specifically apply to plant facilities and grounds.. Vegetation including trees is an attractant for vermin such as rodents, insects, birds, their accompanying waste, feathers, filth and a potential for microbiological contamination, not the least of which is **Salmonella**. As such, Leprino Foods policy requires minimal vegetation at facilities and these must be maintained significantly away from plant operations.

Respectfully,  
Leprino Foods Dairy Products Company

Edith A. Wilkin  
VP—Food Safety & Regulatory Compliance
